**A.C. AEROSOL PRO INSECT KILLER  
MAY BE USED IN FOOD STORES, RESTAURANTS  
HOSPITALS AND FOOD PROCESSING AREAS**

**20.000% ACTIVE INGREDIENTS:**

0.400% pyrethrins

2.000% piperonyl butoxide technical\*

17.600% petroleum distillate

**80.000% INERT INGREDIENTS:**

\*Equivalent to 1.6% of (butylcarbityl) (6-propylpiperonyl) ether and 0.4% related compounds.

**CAUTION**

Store in cool place. Do not expose to temperatures exceeding 120°. Do not puncture container. Remove or protect birds and fish from rooms when spraying for about one hour. Hold container at least three feet from object being sprayed to prevent staining. Do not spray on plants. Wash hands with soap and water after using. Avoid spraying directly on humans, animals, food or asphalt tile floors. Use in food processing plants only when plant is not in operation. All food processing surfaces should be covered or thoroughly cleaned before using. Foods should be removed or protected.

**DIRECTIONS FOR USE**

**FOR FLYING INSECTS:** Spray toward insects for spot infestation. Where heavy or mixed infestation, close doors and windows, spray on the basis of 1.5 ounces per 1000 cubic feet while walking a circle about six feet away from walls directing the spray at the point where the walls meet the ceiling. Leave room closed for 15 to 30 minutes for sensational effect. For large rooms direct a pattern of spray through the middle of the room as you leave.

**FOR SAWYER INSECTS, ROACHES, ANTS, SILVERFISH AND SIMILAR INSECTS:** Spray toward insects for immediate kill. Professional use only. For best results, combine use with A.C. Pro Residual Bug Killer. Where infestation is encountered, place the residual bug killer thoroughly as directed. Then open drawers, cabinets, cupboards and spray A.C. Aero Pro Spray. Spray into these areas from at least three feet distance. Also spray directly into cracks, crevices and hidden places of all kitchen fast furniture. For best results, use both A.C. Aero Pro and these directions will give professional results.
