SEP 26 1967
UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTERED
UNDER NO. 249611 SUBJECT
ATTACHED COMMENTS.

DIRECTIONS FOR USE

OPERATE - Hold can upright and spray infested surfaces only until wet. Kills ANTS, WATERBUGS, SILVERFISH, SPIDERS, CRICKETS, BROWN DOG TICKS. Spray heavily into all cracks around baseboards and other places where these insects hide. Also spray until wet, surfaces behind and beneath cabinets, refrigerators, sinks, stoves, etc. Spray other localized areas infested with these pests. Repeat treatment as required. For ticks, give special attention to pets sleeping areas. Fresh bedding should be used after spraying. Do not spray animals.

CARPET BEETLES - Make localized application to areas of the floor and baseboards. Spray directly into cracks and under carpets where insects may be found. Treat crevices, cracks or closets and infested areas of shelving. Repeat as necessary.

FLIES, MOSQUITOES, WAMPS AND FLYING MOTHS OUTDOORS - For outdoor use only as an aid in reducing annoyance from these insects. Spray outside surfaces of screens, door, window frames or wherever these insects may enter the room. Also treat surfaces around light fixtures on porches, in garages and other places where these insects alight or congregate.

BEES, CHEESEWORMS, ANTS AND BROWN DOG TICKS OUTDOORS - For treatment of localized infestations of these insects in outdoor areas where there is no vegetation, spray infested areas thoroughly. For ants, thoroughly wet hills and runways. Repeat applications as infestations reappear and as reinfestations occur.
