QUICK ACTING

dog flea & tick powder

Geisler Flea and Tick Powder is specifically formulated for use on all breeds of dogs. A single treatment aids in providing protection from reinfestation of fleas, ticks and lice for up to one week.

DIRECTIONS: To kill fleas, ticks and lice, powder should be liberally applied to the body of the dog. Working from the tail toward the head, rub powder against the lay of the hair until it penetrates to the skin. Take care to treat feet and legs. Repeat once weekly if necessary. Ticks are hard to kill. Locate individual ticks and apply powder directly. Comb out dead ticks in a few hours. Do not treat puppies under four weeks of age. To help alleviate reinfestation in kennels and sleeping quarters, force dust into cracks and crevices when applying in and around individual bedding.

Note for Physician: Carbaryl exerts a reversible mild to moderate cholinesterase inhibitory action. Atropine is anti-dotal.

CAUTION: Harmful if swallowed or inhaled. Do not take internally. Avoid breathing dust and prolonged repeated contact with skin. Wash hands thoroughly after use. Avoid contamination of feeds and foodstuffs. Do not reuse this container. Securely wrap in several layers of paper and dispose of single containers during municipal solid waste disposal.

ACTIVE INGREDIENTS:

Carbaryl (1-naphthyl N-methylcarbamate) 5.0%
INERT INGREDIENTS 95.0%

100.0%
