Omaha, NE 68105

Dear Dr. Shotwell:

Subject: Amendment - Labeling Update
Double Duty Plus Flea and Tick Collar with
Metriborh for Cats
EPA Registration No. 2517-25
Your Letter Dated April 29, 1985

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

Separate "Do not use other pesticides etc." from Note to Physicians at the next printing of your label.

This application has been approved based on the provisions of PR Notice 84-4 pertaining to data compensation. A final rule on data compensation has become effective as of April 25, 1985, and future applications must be submitted under these new procedures. Information on new procedures and forms will be set forth in a PR Notice which will be mailed to all registrants and applicants.

Sincerely yours,

George T. LaRocca
Product Manager (15)
Insecticide-Rodenticide Branch
Registration Division (TS-767)

NUTRISORB®

Adjustable—will accommodate up to an 11" neck size.

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS & DOMESTIC ANIMALS

CAUTION: This collar is intended for use as an insecticide and fatty acid generator and is not to be taken internally by man or animal. Not intended for use on humans. The insecticide in this collar is a cholinesterase inhibitor. Do not allow children to handle or play with this collar.

Note to Physicians: This product contains a cholinesterase inhibitor. Atropine sulfate and 2-PAM are antidotal only if signs of cholinesterase inhibition are present. Do not use other pesticides on cat while collar is worn. Some cats and humans may be sensitive to this collar. Remove at first sign of irritation or adverse reaction. Do not use on sick or convalescing cats. Do not use on Persian cats.

DIRECTIONS FOR USE

It is a violation of Federal law to use this collar in a manner inconsistent with its labeling.

Place DOUBLE DUTY PLUS Collar around cat's neck, adjust for proper fit and buckle in place. Cut off and dispose of the excess length. The collar must be worn loosely so that two fingers can be placed between collar and cat's neck. If collar is worn too tightly, it may produce neck irritation. Activity against fleas starts within 24 hours, reaches maximum effectiveness in 3-4 days and continues as long as the collar is worn (up to 150 days). Ticks are relatively harder to kill and die more slowly. Activity against ticks will occur within a few days and will continue killing and controlling ticks for up to 30 days. Fleas and ticks present in the animal's environment that may reappear on the cat will be killed and controlled by the action of the collar. Replace collar when effectiveness diminishes. Collar is not affected by normal wetting such as rainfalls; however, it is suggested collar be removed before bathing.

This DOUBLE DUTY PLUS collar contains NutriSorb™, which releases unsaturated fatty acids necessary for healthy skin and hair. Unsaturated fatty acids are rapidly absorbed to help maintain a lustrous, manageable coat.

DISPOSAL: Do not reuse empty pouch or box. Wrap pouch or box and pet in trash collection. When discarding used collar, wrap in newspaper and place in trash collection.

GUARANTEE: If not satisfied, send used collar and indication of purchase price to ConAgra Pet Products Company, P.O. Box 55033, Omaha, NE 68105 for refund.
