Condition Your Dog's Coat While Killing Fleas & Ticks

**IMPORTANT CONSUMER INFORMATION**

PURPOSE:

SERGEANT'S TICK KILLER WITH COAT CONDITIONER is specially formulated to kill fleas and ticks quickly and to condition your pet's coat at the same time. Many other flea and tick sprays are harsh and therefore dry your pet's coat and skin. This spray contains special agents that actually return your pet's coat to its shiny, natural luster. This product is contained in the new ATMOS™ NON-GAS AEROSOL delivery system.

The product may be sprayed from any angle for ease of application - even upside down! It is also quieter than normal aerosol sprays and, therefore, less frightening to you pet.

DIRECTIONS:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Remove cap, thoroughly spray pet (avoiding face and eyes) against the lay of the coat, fluffing long hair so spray reaches the pet's skin. Spray until pet is wet. This bottle should provide 4 to 6 complete treatments, depending on the size of your pet. One treatment will kill fleas and ticks and help protect against infestation for two weeks. Repeat once a week if necessary. Do not repeat more often than once a week. Use on pet's bedding and immediate area to help further reduce flea and tick infestation.

STORAGE AND DISPOSAL:

Store in cool, dry place. To dispose of empty container, replace cap, wrap in newspaper and discard in trash.

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**BEST AVAILABLE COPY**

CAUTION:

Do not spray into eyes. Avoid breathing of spray and avoid contact with human skin. Wash hands after using. Avoid contamination of food and foodstuffs. Contains a cholinesterase inhibitor; Atropine sulfate is antidote. Harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of treatment area. Avoid contact with skin, eyes or clothing. Do not use on puppies less than six weeks old.

STATEMENT OF PRACTICAL TREATMENT:

If Swallowed: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

If On Skin: Wash with plenty of soap and water,

If In Eyes: Flush eyes with plenty of water. Call a physician if irritation persists.
