EPA SAL 21 August 2009

SIDE/BACK PANEL Pyrethrin-Pyriproxyfen Residual Oviposition Inhibitor Shampoo #1 Pyriproxyfen, pyrethrins, piperonyl butoxide, N-Octyl bicycloheptene dicarboximide

FOR USE ON [CATS] [AND] [KITTENS (OVER 6 MONTHS OF AGE)], [DOGS] [AND] [PUPPIES (OVER 12 WEEKS OF AGE)] TO KILL FLEAS AND TICKS.

The dual synergistic pyrethrins provide immediate killing of fleas and ticks on the pet. Pyriproxyfen is absorbed onto, and sticks tightly to hair and skin, even after complete rinsing. This insect growth regulator (a synthetic flea hormone) kills fleas and their eggs for 1 month and breaks the flea's life cycle by preventing the development of new fleas in the pet's environment and the build-up of reinfestation pressure. Shake well before using. Wet the pet thoroughly with warm water. Apply product onto its back at the rate of approximately 1 tablespoon for each 5 lb. bodyweight (7.5g per kg) for dogs and puppies and 1¼ tablespoonful (8.5g per kg) for cats and kittens. Massage well into the skin to obtain good lathering over the entire body. Allow lather to remain in contact for at least 10 minutes then rinse off. Allow pet to air dry or blow dry. To maintain effective flea life cycle control (through IGR flea egg killing) repeat treatment at least once every month. Under conditions of flea reinfestation pressure from the environment, repeat treatment when new parasites are seen on the pet, but not more frequently than once weekly on dogs and twice monthly on cats.

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Do not store near heat or open flame. Store in original container in a cool, dry place inaccessible to children and pets.

CONTAINER DISPOSAL: If empty: Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
