Prince M. Bamaze
Regulatory Affairs
Sergeant's Pet Care Products, Inc.
10077 South 134th Street
Omaha, NE 68138-3710

Subject: Label Amendment – Revisions to Directions for Use and marketing text
Product Name: SPCP4
EPA Registration Number: 2517-166
Application Date: 26-July-2018
Decision Number: 542987

Dear Mr. Bamaze:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance

EPA Reg. No. 2517-166
Decision No. 542987

with FIFRA section 6. If you have any questions, you may contact Dr. Breeden-Alemi at 703-347-0511 or via email at Breeden-Alemi.Julie@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "J. Herrick".

[PRODUCT INFORMATION]

[[SPCP4 {or} Alternate Brand Name] [This collar] kills fleas and ticks for [up to] 6 [six] months.] [Product Name] Collar is a [double layer] sustained-release system [containing deltamethrin]. Collar has the effect of simultaneous control of fleas and ticks, including ticks that may transmit Rocky Mountain spotted fever]. Use [Product Name] year round for most effective control. Replace every 6 [six] months.]

[[Product Name], containing deltamethrin insecticide, has been specially formulated using [patented] insecticide-release technology. Collar will also kill ticks for [up to] 6 [six] months. Collar will kill ticks including Brown dog tick (*Rhipicephalu sanguineus*), American dog tick (*Dermacentor variabilis*), and deer ticks (*Ixodes scapularis* and *Ixodes pacificus*), which may transmit Lyme disease. This collar should be-worn for continuous protection up to 6 months.] [Replace with a new collar every 6 [six] months.]

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Do not open protective [wrapper {or} pouch{or} package] until ready to use. Do not let children play with this collar. Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

Do not use on puppies under 12 weeks. Do not use on cats. Consult a veterinarian before using this product on debilitated, aged, pregnant, medicated, or nursing dogs. Sensitivities may occur after using ANY pesticide products for dogs. If signs of sensitivity occur, remove collar and bathe your dog with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

This collar is for use only as an insecticide and is not to be taken internally by humans or animals.

[Notice: This product contains a chemical (Di-isodecyl phthalate (DIDP)) known to the State of California to cause birth defects or reproductive harm.]

IF SWALLOWED:	<ul style="list-style-type: none">• Call a poison control center or doctor immediately for treatment advice.• Have person sip a glass of water if able to swallow.• Do not induce vomiting unless told to do so by the poison control center or doctor.• Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none">• Take off contaminated clothing.• Rinse skin immediately with plenty of water for 15-20 minutes.• Call a poison control center or doctor for treatment advice.
IF IN EYES:	<ul style="list-style-type: none">• Hold eye open and rinse slowly and gently with water for 15-20 minutes.• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.• Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also call 1-XXX-XXX-XXXX for emergency medical treatment information.	

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

{DIRECTIONS FOR USE OPTIONS: One of the options below will be used with appropriate collar type; for Multi-Packs the statement: "Use only one collar per dog at a time" will be included}

{Option #1 – FOR EXTRUDED COLLARS}

Do not open [wrapper {or} pouch {or} package] until ready to use. Do not let children play with collar. Dust [will][may] form on collar during storage. Do not get dust in mouth or eyes. [Use only one collar per dog at a time.] Place collar around dog's neck, adjust for fit, and buckle in place. The collar must be worn loosely to allow for growth of the dog and to permit the collar to move about the neck. Maximum effectiveness may not occur for 2-3 weeks after collar placement. Generally, a properly fitted collar is one that when fastened, will snugly slide over dog's head. Two fingers should fit between the collar and neck. Leave 2 or 3 inches for extra adjustment. Cut off excess length, wrap in newspaper and dispose of in the trash. Wash hands after [placing] collar on dog. Replace collar every 6 [six] months.

{Option #2A – FOR INJECTION MOLDED COLLARS}

Do not open [wrapper {or} pouch {or} package] until ready to use. Do not let children play with collar. Dust [will][may] form on collar during storage. Do not get dust in mouth or eyes. [Use only one collar per dog at a time.] Separate the collar from the pull tab strip and discard the pull tab strip in the trash. Place collar around dog's neck; adjust for fit, and buckle in place [with the main clasp]. Feed excess collar through the remaining two clasps for extra hold and a clean fit. The collar must be worn loosely to allow for growth of the dog and to permit the collar to move about the neck. Maximum effectiveness may not occur for 2-3 weeks after collar placement. Generally, a properly fitted collar is one that when fastened, will snugly slide over dog's head. Two fingers should fit between the collar and neck. Leave 2 or 3 inches for extra adjustment. Cut off excess length, wrap in newspaper and dispose in the trash. Wash hands after placing collar on dog. Replace collar every 6 [six] months.

{Option #2B – FOR INJECTION MOLDED COLLARS}

Do not open [wrapper {or} pouch {or} package] until ready to use. Do not let children play with collar. Dust [will][may] form on collar during storage. Do not get dust in mouth or eyes. [Use only one collar per dog at a time.]

1. Unroll the collar.
2. Separate the collar from the pull tab strip. Start at either end by slowly pulling the strip away from the collar. Pull on any remaining strip to remove it. Discard the pull tab strip in the trash.
3. Place the collar around dog's neck. Pinch the buckle, [and] [then] insert the end of the collar through the buckle and slide to adjust for fit. Two fingers should fit between the collar and neck. Maximum effectiveness may not occur for 2-3 weeks after collar placement. The collar must be worn loosely to allow for growth of the dog and to permit the collar to move about the neck.
4. Once fitted comfortably, feed the excess collar through the loops.
5. Any excess length of the collar beyond 2-3 inches past the loops should be cut off, wrapped in newspaper and placed in the trash. (Depending on the size of your dog it may be easier to cut off the excess length before feeding through the loops.)
6. Wash hands after placing collar on dog.

{Optional graphics below may or may not appear on the market label}

Proprietary Triple Clasp System

Peel-Away Comfort Strip

{Option #3 – FOR INJECTION MOLDED COLLARS}

1. Do not open [wrapper {or} pouch {or} package] until ready to use. Do not let children play with collar. Dust [will][may] form on collar during storage. Do not get dust in mouth or eyes. [Use only one collar per dog at a time]. Take the collar out of the packaging and stretch to full length. The tabs that held the collar in place [should][will] fall off when stretching; pull on any remaining tabs to remove them.

{ADDITIONAL OPTIONAL MARKETING STATEMENTS AND GRAPHICS– MAY APPEAR ON THE INSERT LABELING FOR SINGLE OR MULTI-PACK PACKAGING}

Here are a few reminders. If you need additional help we're here!

How does this product work? The collar uses sustained release technology releasing the active ingredient at a steady rate [for] [up to] 6 [six] months. The dog's natural oils help to distribute the product through your dog's skin and coat providing full body protection. The active ingredient, Deltamethrin, kills fleas and ticks by direct contact or if the fleas and ticks ingest it.

How quickly will it start to work? It should start working soon after application, but maximum effectiveness may not occur for 2 to 3 weeks after placement.

Should my dog wear the collar all the time? Yes, the [product name] must be worn continuously to remain effective, and a new one should be replaced every 6 [six] months.

How often do I need to replace the collar? The [product name] should be replaced every 6 [six] months.

What should I do with the piece of collar that I cut off? After removing the extra length of [product name] wrap it in newspaper and place it in the trash.

Do I need to remove the collar when my dog goes out in the rain? No. Wetting the collar will not impair its effectiveness, and it is not necessary to remove the collar if the dog is out in the rain.

Can I place 2 collars on my dog at the same time? No, do not place 2 collars on your dog at the same time. You have two, 6 [six]-month collars to be used sequentially (one after the other) or use one collar for each dog in your household.

My dog wears a standard collar. If I add this collar as a second collar, will the standard fabric collar rub the active ingredients off this collar and reduce its effectiveness?

No, a standard collar should not rub the ingredients off the flea and tick collar. The active ingredient in the collar migrate to the surface at a certain rate. Friction will not affect the rate of release for the active.

Can I use a flea and tick topical, shampoo or spray on my dog while the flea and tick collar is still on?

We do not recommend treating with another topical pesticide product. Other forms of flea and tick treatments contain different active ingredients, and we do not recommend mixing treatments in the event of an adverse reaction.

What should I do if my dog shows signs of irritation from the collar? Sensitivities may occur after using ANY pesticide products for dogs. If signs of sensitivity occur, remove collar and bathe your dog with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

Things to consider if still seeing fleas on your dog: Did you have a lapse in treatment?

It's possible you had fleas in your home or yard that were present BEFORE you started using [SPCP4 {or} Alternate Brand Name]. Adult fleas represent only 5% of the flea population. What you don't see are the other life stages (eggs, larvae, pupae) which could be lurking on your dog or in your home. Break the cycle by regularly using this collar on your dog. This product is for treating fleas and ticks on your dog. For home and outdoor pests please use the appropriate product as needed.

Page 20 of 21

EPA SAL 03/24 /2017

Text in { } is informational/note to reviewer

What To Look For

Fleas: Signs your dog may have fleas can include flea dirt (small dark flakes), excessive itching or scratching. You may also see adult fleas on your dog's coat and skin.

Ticks: Adult ticks are often visible to the naked eye, so you may spot them on short-haired dogs. But with longer-haired dogs, it's best to do a thorough inspection with a flea comb.

Why Protect your Dog?

Both fleas and ticks are small but harmful.

- Some dogs may have sensitivity to flea saliva and can have allergic reactions, leading to painful and intense itching. Fleas can also transmit parasites such as tapeworms.
- Tick bites may also trigger allergic reactions, but even more serious are the diseases they can transmit like Lyme disease.

{Each optional graphic below may or may not appear anywhere on the finished label}

[Water Resistant]

[Our company heritage dates back over 150 years. Polk Miller, a pharmacist and pet lover, started by formulating pet health products for his own dogs in 1868. We continue that tradition today by providing products and services that help take the guesswork out of pet parenting.]
