

CAUTION

Do not get in the eyes.
Avoid skin contact.
Wash thoroughly with soap and water after using.
Avoid inhalation of spray mist.
Harmful if swallowed.

ENVIRONMENTAL CAUTIONS

This product is toxic to fish.
Keep out of lakes, streams, or ponds.
Do not apply where run-off is likely to occur.
Do not apply where weather conditions favor drift from areas treated.
Do not contaminate water by cleaning of equipment, or disposal of wastes.
Use only this product only as specified on this label.

Do not spray directly on pets, domestic livestock, especially dairy animals.
Do not use in milk houses, dairy barns or milk processing plants.

Do not re-use empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.
Keep containers closed when not in use.
Do not use, pour, spill or store near heat or open flame.

Non Warranty

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

DIRECTIONS FOR USE

DO NOT USE THIS PRODUCT FOR ANY USES OTHER THAN THOSE SPECIFIED ON THIS LABEL.

CRACK AND CREVICE TREATMENT IN FOOD HANDLING ESTABLISHMENTS

IN FOOD AREAS: Includes areas for receiving, serving, storage, packing (canning, bottling, wrapping, boxing) preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups).

As an aid in the control of ROACHES, ANTS, SPIDERS, SILVERFISH, CRICKETS, CLOVERMITES, CARPET BEETLES, DRUG STORE BEETLES, CIGARETTE BEETLES, CONFUSED FLOUR BEETLES, RICE WEEVILS, RUSTY GRAIN BEETLES, INDIAN MEAL MOTH, SAW-TOOTHED GRAIN BEETLES, RED FLOUR BEETLES, FLAT GRAIN BEETLES, and GRANARY WEEVILS. Apply MAX KILL 57% MALATHION Emulsifiable Liquid at the rate of 1 gallon in 25 gallons of water. Apply in small amounts directly into cracks and crevices using a pin stream of insecticide in points between different elements of constructions between equipment bases and the floor, wall voids, or hollow equipment legs where the above named insects hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces. Repeat application as necessary.

Do not use this product in conduits, motor housings, and electrical switch boxes.

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN CRACK AND CREVICE TREATMENT ARE NOT PERMITTED.

IN NON-FOOD AREAS: Includes garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

Apply as a coarse spray to baseboard areas, around water pipes, surfaces behind and beneath sinks, lockers, tables, pallets and similar areas where insects hide or through which they may enter.

AS A GRAIN PROTECTANT: For each 1000 bushels of grain to be put into storage, mix 1 pint of this concentrate with 3 gallons of water and spray the emulsion onto the grain as it is put into storage. Spray as much of the grain surface as possible. Good coverage is necessary for good protection.

AS A TOP DRESSING FOR GRAIN IN STORAGE: For each 1000 square feet of grain surface on top of grain bins mix 1/2 pint of this concentrate with 6 quarts of water and spray the surface. Where infestation has already taken place, rake the surface to a depth of about 4 inches after spraying and respray the new surface with the same strength mixture.

AS A CLEAN-UP SPRAY FOR GRAIN FACILITIES: First clean up the storage bins, elevators, elevator boots, handling equipment and all other grain facilities to be sprayed. Remove all old grain, dirt and debris. Best results are obtained when the emulsion is used on clean surfaces. Mix 1 gallon of this concentrate with 25 gallons of water and spray the surface until they are wet.

FOR HOUSE FLIES: To aid in the reduction of house fly population mix 2 gallons of MAX KILL MALATHION with 100 gallons of water and spray the places where flies congregate and breed, unoccupied dairy barns, (Caution: do not use where milk is stored or processed), horse barns, sheep barns, poultry houses, manure piles, garbage heaps, city dumps, corrals, etc. Apply spray to ceilings, walls, and other surfaces where flies rest until surfaces are thoroughly wet.

FOR BAIT SPRAY: Use 2 gallons of unsulfurized molasses or corn syrup (or 20 lbs. of sugar) with 2 gallons of this concentrate and 100 gallons of water. Repeat application as needed.
