

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS (AND DOMESTIC ANIMALS)

CAUTION

Harmful if swallowed

Avoid inhalation spray mist

Irritating to skin and eyes

Do not get in the eyes

Avoid skin contact

Wash thoroughly with soap and water after using

Avoid contamination of cooking utensils, food ingredients, feed and water supplies

Do not use in the edible product areas of food processing plants

Do not use in milk houses or dairy barns

Do not spray directly on feed, foodstuffs or raw ingredients

Do not spray directly on pets, domestic livestock, especially dairy animals

Wear a pesticide respirator jointly approved by the Mining, Enforcement and Safety Administration (formerly the U.S. Bureau of Mines) and by the National Institute for Occupational Safety and Health under the provisions of CFR 20 Part II

ENVIRONMENTAL HAZARDS

Remove fish, and birds and other domestic pets from room during spraying and keep out of room until spray is dry

This product is toxic to fish. Do not apply directly in water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

NON-WARRANTY

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

1. PRECAUTIONS

Do not contaminate water, food or feed by storage and disposal.

2. PESTICIDE DISPOSAL

Pesticide wastes are toxic. Improper disposal of excess pesticide or mixture is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your state pesticide or environmental control agency or the hazardous waste representative at the nearest EPA regional office for guidance.

3. CONTAINER DISPOSAL

Triple rinse for equivalents. Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

4. GENERAL

Consult federal, state and local disposal authorities for approved procedures other than those given above. Approved procedures vary considerably, for different types of generators.

5. EQUIVALENT METHOD TO TRIPLE RINSING

Empty drums as completely as possible. Remove the bungs and place the drums upside down until liquid has evaporated.

Mill & Bin Spray

KILLS EXPOSED STAGES OF:

Granary Weevil, Cigarette, Confused Flour Beetle, Saw-Toothed Grain Beetle, Angoumois Grain Moth, Indian Meal Moth, Lesser Grain Borer, Roaches, Flies, Black Carpet Beetles & Meal Worms.

ACTIVE INGREDIENTS

ACTIVE INGREDIENTS	100%
Technical Methoxychlor	3.0%
Pyrethrins	.025%
Technical Piperonyl Butoxide	0.063%
Aromatic Petroleum Derivative	
Solvent	20.0%
Petroleum Distillate	76.912%
Total Ingredients	100%

* Equivalent to 2.64% of 2, 2-bis (p-methoxyphenyl) -1, 1, 1-trichloro ethane and 0.38% of other isomers and related compounds.

**Equivalent to 0.05% of (butyl carbityl) (6-propylpiperonyl) ether and 0.013% of related compounds.

Keep Out of The Reach of Children CAUTION

IF SWALLOWED call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger, or if available, by administering syrup of ipecac. Do not induce vomiting or give anything by mouth to an unconscious person.

IF ILLNESS RESULTS FROM INHALATION remove to fresh air, and call a physician.

IF ON SKIN immediately remove contaminated clothing and wash skin with soap and plenty of water.

IF IN EYES flush with plenty of water for at least fifteen minutes and get medical attention.

DIRECTIONS FOR USE

MAX KILL MILL & BIN SPRAY is a ready to use combination long lasting insecticide that is best applied through conventional tank type pressure sprayers.

AS A CLEAN UP SPRAY in food processing plants, warehouses, mills and elevators apply as a coarse, wet spray to surfaces and areas where insects are known to be harboring. Avoid the contamination of equipment. After application allow for complete drying in areas where bagged feed or foodstuffs might be stored. It may be used as a clean up spray in bin bottoms after they have been thoroughly cleaned and before any grain is put back into the bin. One gallon should cover approximately 750 square feet.

AS A PROTECTANT in empty box cars, trucks and shipholds apply as a coarse wetting spray to all exposed surfaces. Allow for complete drying before any commodity loading.

AS A BIN SPRAY in farm granaries thoroughly clean and remove all dust and debris before applying a coarse, wetting spray to all exposed surfaces. Here again complete drying is necessary before any commodities are placed into the bin. Do not spray directly on grain and do not contaminate any feed or food stuffs. One gallon should cover approximately 750 square feet on non-absorbant surfaces.

AS A FOG in inedible product areas of food processing plants, elevator galleries and tunnels apply through a mechanical type fogger or mister at a rate of one quart per 5,000 cubic feet. Do not apply while equipment is in operation, and allow for complete setting of the fog or mist before any grain is conveyed. This method is quite satisfactory for the control of the adult stages of Indian Meal Moth. Repeat as needed.

See left panel for further precautions when using
