

8/15/88 28

ACCEPTED
MAY 15 1989
Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 2548-28

EPA-PR

10/1

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
(AND DOMESTIC ANIMALS)
CAUTION**

Handle with care.
Avoid contact with skin, eyes, clothing, food, and feed.
Do not breathe vapors.
Avoid contact with surfaces.
Wash thoroughly with soap and water after use.
Avoid contact with surfaces.
Do not use near food, feed, or animal quarters.
Do not use in areas where children play.
Do not use on surfaces where food is stored.
Do not spray near food, feed, or animal quarters.
Wear a dust mask, gloves, and goggles when using this product. Avoid contact with skin, eyes, clothing, food, and feed. Wash thoroughly with soap and water after use. Avoid contact with surfaces. Do not use near food, feed, or animal quarters. Do not use in areas where children play. Do not use on surfaces where food is stored.

ENVIRONMENTAL HAZARDS

Remove fish and birds and other domestic animals from area before spraying. Do not spray on water. This product is toxic to fish. Do not apply directly to water. Do not use in areas where fish are kept. Do not use on surfaces where food is stored.

NON WARRANTY

Seller makes no warranty, expressed or implied, concerning the use of this product. Buyer assumes all risk of use. Do not use if instructions are not followed.

DIRECTIONS FOR USE

Use as directed. Do not use if instructions are not followed.

STORAGE AND DISPOSAL

1. PROHIBITIONS
Do not use in areas where food is stored.

2. PESTICIDE DISPOSAL
Pesticide wastes are flammable and toxic. Do not use in areas where food is stored.

3. CONTAINER DISPOSAL
Do not use in areas where food is stored.

4. GENERAL
Do not use in areas where food is stored.

5. EQUIVALENT METHOD TO TRIPLE RINSING
Do not use in areas where food is stored.

Mill & Bin Spray

Ready To Use - Long Lasting
Quick Knockdown

KILLS EXPOSED STAGES OF:
Granary Weevil, Cadelle, Confused Flour Beetle, Saw-Toothed Grain Beetle, Angoumois Grain Moth, Indian Meal Moth, Lesser Grain Borer, Roaches, Flies, Black Carpet Beetles & Meal Worms

ACTIVE INGREDIENTS:
Technical Methoxychlor* 3.0%
Pyrethrins 0.25%
Technical Piperonyl Butoxide** 0.063%

INERT INGREDIENTS:
Aromatic Petroleum Derivative 20.0%
Solvent 76.812%
Petroleum Distillate

*Equivalent to 2.64% of 1, 1, 1-trichloro-2, 2-bis(p-methoxyphenyl) ethane and 0.36% of other isomers and related compounds.
**Equivalent to 0.05% of (butyl carbityl) (6-propylpiperonyl) ether and 0.013% of related compounds.

KEEP OUT OF THE REACH OF CHILDREN CAUTION

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: DO NOT INDUCE VOMITING. See medical aid. Aspiration of product into lungs due to vomiting can cause chemical pneumonia which can be fatal. Emergency medical personnel should remove poison by gastric lavage.
IF BREATHED: If inhaled in heavy concentrations or if illness results, remove to fresh air and get medical attention. Administer artificial respiration, oxygen or cardiopulmonary resuscitation if needed.
IF ON SKIN: Remove contaminated clothing. Wash with mild soap and water. Launder contaminated clothing. If irritation occurs, see medical aid.
IF IN EYES: Flush with plenty of water. If irritation persists, see medical attention.

DIRECTIONS FOR USE

MAX KILL® MILL & BIN SPRAY is a ready to use combination long lasting insecticide that is best applied through conventional tank type pressure sprayers.

AS A CLEAN UP SPRAY in food processing plants, warehouses, mills and elevators apply as a coarse, wet spray to surfaces and areas where insects are known to be harboring. Avoid the contamination of equipment. After application allow for complete drying in areas where bagged feed or foodstuffs might be stored. It may be used as a clean up spray in bin bottoms after they have been thoroughly cleaned and before any grain is put back into the bin. One gallon should cover approximately 750 square feet.

AS A PROTECTANT in empty box cars, trucks and shipholds apply as a coarse wetting spray to all exposed surfaces. Allow for complete drying before any commodity loading.

AS A BIN SPRAY in farm granaries thoroughly clean and remove all dust and debris before applying a coarse, wetting spray to all exposed surfaces. Here again complete drying is necessary before any commodities are placed into the bin. Do not spray directly on grain and do not contaminate any feed or food stuffs. One gallon should cover approximately 750 square feet on non-absorbant surfaces.

AS A FOG in inedible product areas of food processing plants, elevator galleries and tunnels apply through a mechanical type fogger or mister at a rate of one quart per 5 000 cubic feet. Do not apply while equipment is in operation and allow for complete settling of the fog or mist before any grain is conveyed. This method is quite satisfactory for the control of the adult stages of Indian Meal Moth. Repeat as needed.

See left panel for further precautions when using.
