DIRECTIONS

FOR A COMPLETE LIST OF APPLICABLE USES, SEE THE PRODUCT LABEL OR THE MANUFACTURER'S LITERATURE.

MAX KILL CONTACTICIDE is a surface and contact **READY TO USE** insecticide designed for use in flour mills, feed mills, rice mills, feed and food processing plants, cereal grain processing plants, grain elevators, granaries, ship holds, barges, empty boxcars, grain trucks, warehouses, feed and seed stores, grocery stores, restaurants and hotels.

WHEN USED AS A SPRAY in cereal grain processing plants, grain handling facilities, elevators, granaries for the control of accessible stages of the primary weevil, the weevil, the confused flour beetle, sawtoothed grain beetle, lesser grain borer, and other stored grain insects, spray the walls and other surfaces of the storage and handling areas with particular attention to cracks, crevices, and other protected locations. Waste grain, dust, dirt, and debris should be removed and destroyed, and storage areas thoroughly cleaned before spraying. Treat unloading, handling and processing areas, as well as empty elevators, processing and handling equipment, for example the insect weevil, flour mill, roller, rollers, screens, housings and hoppers, etc., thoroughly. Spray thoroughly around the base of heavy machinery. Equipment to be sprayed should be thoroughly dry before use. One gallon will cover 750 square feet of a smooth surface.

AS A PROTECTANT in empty boxcars, grain trucks, barges and storage facilities, spray the accessible stages of the granary, weevil, rice weevil, etc., in stored grain, and other stored grain beetle, lesser grain borer, etc., and other stored grain insects. Spray the floors, walls, and other surfaces, and other protected harborage points until surfaces are wet. A fine mist, evenly applied, will cover 750 square feet of a smooth surface.

WHEN USED AS A SPRAY in food plants, grocery stores, feed stores, etc., spray the accessible stages of the granary, weevil, rice weevil, etc., in stored grain, and other stored grain beetle, lesser grain borer, etc., and other stored grain insects. Spray the floors, walls, and other surfaces, and other protected harborage points until surfaces are wet. A fine mist, evenly applied, will cover 750 square feet of a smooth surface.

WHEN USED AS A FOG in grain elevators, grain trucks, barges, etc., spray the accessible stages of the granary, weevil, rice weevil, etc., in stored grain, and other stored grain beetle, lesser grain borer, etc., and other stored grain insects. Spray the floors, walls, and other surfaces, and other protected harborage points until surfaces are wet. A fine mist, evenly applied, will cover 750 square feet of a smooth surface.

WHEN USED AS A FOG in grain elevators, grain trucks, barges, etc., spray the accessible stages of the granary, weevil, rice weevil, etc., in stored grain, and other stored grain beetle, lesser grain borer, etc., and other stored grain insects. Spray the floors, walls, and other surfaces, and other protected harborage points until surfaces are wet. A fine mist, evenly applied, will cover 750 square feet of a smooth surface.
