

**How Mountain Flea Powder is made:** Carbaryl and dichlorophene to reduce itching and scratching due to bites of insects. A single treatment gives protection against fleas, lice and ticks for days.

Dust entire dog beginning at head and working back, being sure powder gets down to skin and taking care to treat feet and legs. Dust dog's living quarters freely. Repeat at weekly intervals if necessary. **DO NOT GET IN EYES OR FACE OF ANIMALS, DO NOT USE ON KITTENS OR PUPPIES.**

For itching and scratching due to bites of insects, dust thoroughly including the feet.

Harmful if swallowed. Avoid breathing dust, and prolonged repeated contact. Wash thoroughly if hands become contaminated.

Carbaryl is a moderate cholinesterase inhibitor. DDT is anti-DDT.

Carbaryl (1-naphthyl Naphthylcarbamate)	5.0%
2,2' methylenebis (4-Chlorophenol) (Dichlorophene)	5%
	94.5%
	<u>100.0%</u>
