LOGLIFE 90 DAY COLLAR

FOR DOGS WITH NECKS TO 21"

UNCONDITIONAL MONEY-BACK GUARANTEE BY LOGLIFE

READ ENTIRE LABEL BEFORE EACH USE • USE ONLY ON DOGS

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. REMOVE COLLAR FROM PACKAGE, UNROLL AND STRETCH TO ACTIVATE INSECTICIDE GENERATOR

Do not use on puppies less than 6 weeks of age. Do not unroll collar until ready to use. Place the Longlife® 90 Day™ Brand collar around the dog's neck, adjust for proper fit, and buckle in place. The collar must be worn loosely to allow for growth of the dog and to permit the collar to move about the neck. Generally, a properly fitted collar is one that when fastened will snugly slide over the dog's head. Leave 2 or 3 inches on the collar for extra adjustment and cut off and dispose of the extra length. Consult a veterinarian before using this product on debilitated, aged or medicated animals. If used on pregnant or nursing dogs, do not replace the collar until the puppies are at least 6 weeks old. Sensitivities may occur after using ANY pesticide product for pets. Some animals may become irritated by any collar if it is applied too tightly. If this occurs, loosen the collar. If irritation continues, remove the collar from the animal. If signs of sensitivity occur, remove the collar and bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. Do not use this product on animals simultaneously or within 30 days before or after treatment with or exposure to cholinesterase inhibiting drugs, pesticides, or chemicals. However, flea & tick collars may be immediately replaced. This collar is intended for use as an insecticide generator.

For continuous flea protection under normal conditions, replace the collar every 3 months. Under conditions where dogs are exposed to severe flea infestation, it may be necessary to replace the collar every 2 months. Ticks may be an occasional problem for dogs. The collar will kill ticks, including the Rocky Mountain Wood Tick, carrier of Rocky Mountain Spotted Fever, and the Deer Tick, which may carry Lyme Disease, for 60 days and continue to aid in their control an additional 30 days. The dog should be examined from time to time and the collar replaced when mature tick or flea populations begin to appear. Wetting will not impair the collar's effectiveness or pet's protection. If the dog goes swimming or is out in the rain, it is not necessary to remove the collar. The Longlife® 90 Day™ Brand collar may be worn with a regular collar.

DISPOSAL - Do not use empty pouch. Dispose in trash collection.
