The collar must be worn loosely to allow for growth of the dog and to permit the collar to move about the neck. If used on pregnant or nursing dogs, do not replace the collar until the puppies are at least 6 weeks old. Sensitivities may occur after using ANY pesticide product for pets. Some animals may become irritated by any collar if it is applied too tightly. If this occurs loosen the collar. If irritation continues, remove the collar from the animal. Under conditions where dogs are exposed to severe flea infestation it may be necessary to replace the collar every 2 months. Ticks may be an occasional problem for dogs. The collar will kill ticks, including the Rocky Mountain Wood Tick, carrier of Rocky Mountain spotted fever, and the Deer Tick, which may carry Lyme disease, for 60 days and continue to aid in their control an additional 30 days. The dog should be examined from time to time and the collar replaced when mature tick or flea populations appear. Wetting will not impair the collar's effectiveness or pet's protection. If the dog goes swimming or is out in the rain it is not necessary to remove the collar. (The Longlife 90 Day Brand Collar) (alternate brand name) may be worn with a regular collar.
