### Directions:

- Stray animals are frequently attracted to areas where urine or feces have been deposited. First, remove any droppings and spray contaminated area.
- For best results spray only on the ground all around plants, shrubbery and trees attracting animals.
- The most effective control for a pet is the sharply spoken word backed up with disciplinary action. This repellent should be used in conjunction with training until habit is broken. For best results use every 12-24 hours.
- Do not apply directly to flowers or foliage of shrubs or ornamental plants.
