DIRECTIONS FOR USE

CAUTION: FERTILIZER ACTION. It is a violation of Federal law to use this product in a manner inconsistent with the labeling.

REMOVE COLLAR FROM PACKAGE, UNROLL AND STRETCH TO ACTIVATE INSECTICIDE GENERATOR

Remove the collar from the package, then place the Hartz "2 in 1 Plus" collar around the dog's neck and fasten the buckle in place. The collar must be worn loosely to allow the insecticide generator to permeate the collar to move about the neck. Generally, a properly fitted collar will be snug but when stretched will hang loose over the dog's head. The insecticide generator will be activated by extra adjustment and cut off and exposure of the collar to the sun. The collar may become irritated by any collar if it is applied too tightly. It should be removed if the collar becomes uncomfortable. Remove the collar from the animal if the animal shows signs of irritation or discomfort.

Keep the collar away from dogs, including Rocky Mountain Wood Tick, carrier of Rocky Mountain Spotted Fever. The collar will begin to kill fleas and ticks immediately. Its ability to protect against harder to kill ticks will be built up within a few days after being placed on the pet. For continuous flea and tick protection under normal conditions replace the collar every **five months**. Under conditions where dogs are exposed to severe flea or tick infestations it may be necessary to replace the collar more frequently. Wetting will not impair the collar's effectiveness or the pet's protection. If the dog goes swimming or is out in the rain it is not necessary to remove the collar. The Hartz "2 in 1 Plus"™ collar may be worn with a regular collar.

DISPOSE OF COLLAR IN EMPTY POUCH. Dispose in trash collection.
