Mr. William Perlberg
The Hartz Mountain Corporation
700 South Fourth Street
Harrison, NJ 07029-9987

Dear Mr. Perlberg:

Subject: Response to Agency Letter of April 12, 1989
Hartz 2 in 1 Plus Long Lasting Collar for Dogs
EPA Registration No. 2596-62
Your Submission Dated September 13, 1989

In regard to your objection concerning the precautionary labeling requirements with respect to the use of this product on pregnant dogs, and newborn and nursing puppies, we have the following comments:

We would accept the precautionary statement as proposed "It is not advisable to use this collar on puppies less than six weeks of age." in lieu of the previously recommended statement. This precaution should be placed on all of the Hartz pet collars containing the active ingredient tetrachlorvinphos. Please note comments 2 (a) and 2 (c) of our letter of April 12, 1989 and revise your labeling accordingly at the next label printing.

Sincerely,

George T. LaRocca
Product Manager (15)
Insecticide-Rodenticide Branch
Registration Division (H7505C)

**REMOVE COLLAR FROM PACKAGE, UNROLL
STRETCH TO ACTIVATE INSECTICIDE GEN**

Do not unroll collar until ready to use. Place the Hartz 2 in 1 collar around the dog's neck, adjust for proper fit, and buckle. Collar must be worn loosely to allow for growth of the dog's neck. Generally, a properly fitted collar when fastened will snugly slide over the dog's head. Leave collar for extra adjustment and cut off and dispose of collar. Some animals may become irritated by any collar if it is applied. If irritation occurs, remove collar. If irritation continues, remove collar. This collar is intended for use only as an insecticide. Kills fleas and ticks common to dogs, including Rocky Mountain Spotted Fever. The collar will begin to kill fleas and ticks immediately. Its full protection against fleas and ticks will be up within a few days after being placed on the pet. For continued protection under normal conditions replace the collar every 5 months. Under conditions where dogs are exposed to severe flea or tick infestation, it may be necessary to replace the collar more frequently. We warrant the collar's effectiveness or the pet's protection. If the collar is damaged or is out in the rain it is not necessary to remove the collar. A 2 in 1 collar may be worn with a regular collar.
DISPOSAL—Do not use empty pouch. Dispose in trash collection.
