IMPORTANT CONSUMER INFORMATION AND PET I.D. TAG OFFER PRINTED ON INSIDE OF PACKAGE

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

REMOVE COLLAR FROM PACKAGE, UNROLL AND STRETCH TO ACTIVATE. AS THE COLLAR BEGINS TO WORK A FINE WHITE POWDER WILL APPEAR ON THE SURFACE.

ACTIVE INGREDIENT: - By Weight (Nom.)
Tetrachlorvinphos: 2-Chloro-1-(2,4,5-trichlorophenyl) vinyl dimethyl phosphite 14.55%
INERT INGREDIENTS: 85.45%
TOTAL 100.00%

The 2 in 1[®] collar will kill ticks, including the Deer Tick, which may carry Lyme Disease, for five months under normal conditions.

It is not advisable to use this collar or similar pesticides on kittens less than 6 weeks of age. Do not unroll collar until ready to use. Place the Hartz 2 in 1[®] Flea & Tick Collar around the cat's neck, adjust for proper fit, and buckle in place. The active ingredient will work its way from the surface of the collar onto your pet's coat providing continuous protection against fleas and ticks. The collar must be worn loosely to allow for growth of the cat and to permit the collar to move about the neck. Generally, a properly fitted collar is one that when fastened will snugly slide over the cat's head. Leave 2 or 3 inches on the collar for extra adjustment and cut off and dispose of the extra length. Some animals may become irritated by any collar if it is applied too tightly. If this occurs loosen the collar. If irritation continues, remove the collar from the animal. This collar is intended for use only as an insecticide generator.

For continuous flea and tick protection under normal conditions replace the collar every five months. Under conditions where cats are exposed to severe flea or tick infestations it may be necessary to replace the collar every 4 months. Ticks, which may be an occasional problem for cats, are harder to kill. The collar's full protection against ticks will be built up within a few days after being placed on the animal. The cat should be examined from time to time and the collar replaced when mature tick or flea populations begin to appear. Wetting will not impair the collar's effectiveness or the pet's protection. If the cat is out in the rain it is not necessary to remove the collar. The Hartz 2 in 1[®] collar may be worn with a regular collar.

DISPOSAL - Do not use empty pouch.
Dispose in trash collection.
