BRIGHT WHITE

FOR CATS

Kills for 5 Months

CAUTION: Do not let children play with this collar. See back panel for ingredient statement.

CONTENTS: 1 WHITE COLLAR, NET WT. 0.53 oz 15 g

804651

The 2 in 1® collar will kill ticks, including the Deer Tick, which may carry Lyme Disease, for five months under normal conditions.

Do not use on kittens under 12 weeks of age. Do not unroll collar until ready to use. Place the Hartz® 2 in 1® Flea & Tick Collar around the cat's neck, adjust to proper fit, and buckle in place. The collar must be worn loosely to allow for growth of the cat and to permit the collar to move about the neck. Generally, a properly fitted collar is one that when fastened will snugly slide over the cat's head. Leave 2 or 3 inches on the collar for extra adjustment and cut off and dispose of the extra length. Consult a veterinarian before using this product on debilitated, aged, medicated, pregnant or nursing animals. Sensitivities may occur after using ANY pesticide product for pets. Some animals may become irritated by any collar if it's applied too tightly. If this occurs, loosen the collar. If irritation continues, remove the collar from the animal. If signs of sensitivity occur, remove the collar and bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. Do not use this product on animals simultaneously or within 30 days before or after treatment with or exposure to cholinesterase inhibiting drugs, pesticides, or chemicals. However, flea & tick collars may be immediately replaced. This collar is intended for use only as an insecticide generator. For continuous flea and tick protection under normal conditions replace the collar every five months. Under conditions where cats are exposed to severe flea or tick infestations it may be necessary to replace the collar every 4 months. Ticks, which may be an occasional problem for cats, are harder to kill. The collar's full protection against ticks will be built up within a few days after being placed on the animal. The cat should be examined from time to time and the collar replaced when mature tick or flea populations begin to appear. Wetting will not impair the collar's effectiveness or the pet's protection. If the cat is out in the rain it is not necessary to remove the collar. The Hartz® 2 in 1® collar may be worn with a regular collar.

DISPOSAL: Do not use empty pouch. Dispose in trash collection.

For more information call our flea & tick experts at 1-800-275-1414 weekdays, 9am-5pm E.S.T.
