Back Panel continued

Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing or medicated animals. Sensitivities may occur after using ANY pesticide product for pets. Some animals may become irritated by any collar if it is applied too tightly. If this occurs, loosen the collar. If irritation continues, remove the collar from the animal. If signs of sensitivity occur, remove the collar and bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. Do not use this product on animals simultaneously or within 30 days before or after treatment with or exposure to cholinesterase inhibiting drugs, pesticides, or chemicals. However, flea & tick collars may be immediately replaced.

This collar is intended for use only as an insecticide generator. The collar will begin to kill fleas and ticks immediately. Its full protection against harder to kill ticks will be built up within a few days after being placed on the pet. For continuous flea and tick protection under normal conditions replace the collar every 5 months. Under conditions where cats are exposed to severe flea or tick infestations it may be necessary to replace more frequently, however, do not replace the collar more frequently than every 4 months. Wetting will not impair the collar's effectiveness or the pet's protection. If the cat is out in the rain it is not necessary to remove the collar. The (Hartz® 2 in 1® Flea & Tick Collar for Cats) (alternate brand name) (or) (this product) may be worn with a regular collar.

**STORAGE AND DISPOSAL**

**STORAGE:** Store at room temperature.

**DISPOSAL:** Do not use empty pouch. Place in trash or offer for recycling if available.
