DIRECTION
It is a violation of Federal Law to use this prod

**REMOVE COLLAR FROM PACK
ACTIVATE INSECT**

Do not unroll collar until ready to use. Place collar around cat's neck, adjust for proper fit, and buckle. Allow for growth of the cat and to permit the collar to be properly fitted collar is one that when fastened allows 2 or 3 inches on the collar for extra adjustment. Some animals may become irritated if the collar is too tight. If irritation occurs loosen the collar. If irritation continues the collar is intended for use only as an insecticide.

For continuous flea protection under normal conditions where cats are exposed to fleas, the collar should be replaced more frequently. Ticks, which are harder to kill, may carry Lyme Disease, will be built up on the animal. The 2 in 1 Plus collar will kill ticks and fleas in their control an additional 2 months. The collar should be replaced when mature tick or flea infestation occurs or not impair the collar's effectiveness or the protection. It is not necessary to remove the collar. The Hartz 2 in 1 Plus collar is recommended for flea and tick control with a product registered under EPA Reg. No. 2596-83. Tick Spray. It is not advisable to use this product if the animal is less than 6 weeks old.

DISPOSAL - Do not reuse empty pouch. Dispose in household trash collection.
