Registration Division (H7505C)  
401 "M" St., S.W.  
Washington, D.C. 20460

EPA Reg. Number:  
2596-84

Date of Issuance:  
AUG 24 1999

Term of Issuance: Unconditional

Name of Pesticide Product: Hartz®2 In 1  
Plus Seven Month Collar For  
Dogs With Rabon®

NOTICE OF PESTICIDE:

— Registration  
☒ Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Ms. Yvette Henderson  
Hartz Mountain Corp.  
400 Plaza Drive  
Secaucus, New Jersey 07094

**Note:** Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Documents, EPA has reregistered the product listed above. This action is taken under the authority of section 4 (g) (2) (c) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Registration under this section does not eliminate the need for control reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product. With regards to labeling, you must make the labeling changes listed below:

1) Based upon the acute toxicity profile for this product:

- a) Your product is required to have "Precautionary Statements" with the subheading of "Hazards to Humans and Domestic Animals." You may not included these statements in your "Directions for Use." Your "Precautionary Statements" should appear as follows:

**PRECAUTIONARY STATEMENTS**  
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**

Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

Signature of Approving Official

*M. Dow for G. LaRocca*

Date

AUG 24 1999

- b) Your product is required to have the following "First Aid" statements:

### FIRST AID

**IF SWALLOWED:** Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger, or if available by administering syrup of ipecac. If person is unconscious, do not give anything by mouth and do not induce vomiting.

**IF ON SKIN:** Wash with plenty of soap and water. Get medical attention if irritation persists.

**IF IN EYES:** Flush eyes with plenty of water. Call a physician if irritation persists.

Your product is also required to have a "Note to Physicians and Veterinarians." This should be located directly below your "First Aid" Statement and should contain the following information:

- Technical Information on symptomatology;
- Use of supportive treatments to maintain life functions;
- Medicine that will counteract the specific physiological effects of the pesticide;
- Company telephone number to specific medical personnel who can provide specialized medical advice;
- Information for Veterinarians.

c) The ingredient statement must appear on the front panel unless you provide justification to place the ingredient statement on the back or other panel. If the Agency agrees to allow placement on the back or other panel; 1) a referral statement must be placed on the front panel; 2) the statement on the back or other panel cannot be hidden but must be easily locatable; and 3) the statement should be in easier to read and larger font than it would be if it had remained on the front panel.

d) On the Alternate Copy, change "Eliminating" to "Controlling" or "Killing". Claims stating or implying eradication of pests are not acceptable. We regret that this was overlooked in our previous reviews.

e) Please delete the statement "For continuous flea and tick protection under normal conditions replace the collar every 5 months. Under conditions where dogs are exposed to severe flea and tick infestations it may be necessary to replace the collar more frequently." The second sentence of this statement is ambiguous and does not provide the consumer with the minimum acceptable amount of time between applications. Please replace the above with this statement: "For continuous flea and tick protection under normal conditions replace the collar every 5 months. Under conditions where dogs are exposed to severe flea and tick infestations it may be necessary to replace the collar more frequently, however do not replace the collar more frequently than every \_\_\_\_\_ months" (the minimum duration

between collar changes should be based on your efficacy and domestic animal safety data).

f) Enclosed is a copy of your label submitted 7 April 1999 stamped "Accepted with Comments". Please submit two (2) copies of your final printed label before you release this product for shipment. I'll be happy to answer any questions you may have regarding this action.

Sincerely,

George T. LaRocca  
Product Manager  
Insecticide Branch  
Registration Division 7505C

IMPORTANT: CONSUMER INFORMATION AND PET I.D. TAG OFFER PRINTED ON INSIDE OF PACKAGE

### READ ENTIRE LABEL BEFORE EACH USE. USE ONLY ON DOGS

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

REMOVE COLLAR FROM PACKAGE UNROLL AND STRETCH TO **ACTIVATE** INSECTICIDE GENERATOR. As the collar begins to work, a fine white powder will appear on the surface.

Do not use on puppies under 6 weeks of age. Do not unroll collar until ready to use. Place the Hartz 2 in 1 Plus collar around the dog's neck, adjust for proper fit, and buckle in place. The collar must be worn loosely to allow for growth of the dog and to permit the collar to move about the neck. Generally, a properly fitted collar is one that when fastened will snugly slide over the dog's head. Leave 2 or 3 inches on the collar for extra adjustment and cut off and dispose of the extra length. Consult a veterinarian before using this product on debilitated, aged or medicated animals. If used on pregnant or nursing dogs, do not replace collar until the puppies are at least 6 weeks old. Sensitivity may occur after using ANY pesticide product for pets. Some animals may become irritated by any collar if it is applied too tightly. If this occurs loosen the collar. If irritation continues, remove the collar from the animal. If signs of sensitivity occur remove the collar and bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. Do not use this product on animals simultaneously or within 30 days before or after treatment with or exposure to cholinesterase inhibiting drugs, pesticides, or chemicals. However, flea and tick collars may be immediately replaced. This collar is intended for use only as an insecticide generator. Kills fleas and ticks common to dogs, including the Deer Tick, which may carry Lyme Disease, and the Rocky Mountain Wood Tick, which may carry Rocky Mountain Spotted Fever. The collar will begin to kill fleas and ticks immediately. Its full protection against harder to kill ticks will be built up within a few days after being placed on the pet. For continuous flea and tick protection under normal conditions replace the collar every seven months. The collar kills ticks for 5 months and aids in their control an additional 2 months. Under conditions where dogs are exposed to severe flea and tick infestations it may be necessary to replace the collar more frequently. Wetting will not impair the collar's effectiveness or the pet's protection. If the dog goes swimming or is out in the rain it is not necessary to remove the collar. The Hartz 2 in 1 Plus collar may be worn with a regular collar. It is recommended that the pet's bedding or sleeping quarters be treated for flea and tick control with a product registered for this use such as Hartz 2 in 1 Flea and Tick Spray.

DISPOSAL - Do not use empty pouch. Dispose in trash collection.
