DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Remove cap and invert tube. **To kill attached ticks**, press down a few times until product saturates tip. Touch the tip of the applicator to the tick, making sure that a small amount of product wets the tick. Within a few hours the tick will release and may be easily removed. Do not pull tick out until it releases. Unattached ticks and fleas will also be killed quickly if touched with the applicator.

For general tick and flea control, run tip of applicator along the hair, pressing down to skin if possible. Apply around the neck of the animal, down the back and the belly, at the base of the tail and around the ears. Repeat weekly (if necessary).
