NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) since you have agreed to:

1. Submit and/or cite all data or other material for registration/ reregistration of your product under FIFRA section 3(c)(5) or FIF A section 4 when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
  - a. Add the phrase, "EPA Registration No. 2596-121."
  - b. Revise the chemical name for esfenvalerate by inserting a "4" between (s) and CHLORO.

As required in PR-Notice 91-2, the label claim for active ingredients must be based on the nominal concentration rather than the lower certified limit. The nominal concentration should fall between the upper and lower certified limits. Moreover, the lower certified limit may not fall below the efficacy level. Based on the Confidential Statements of Formula (CSF) dated 9/18/90, the nominal concentration of esfenvalerate is 0.034% x 75% or 0.0255%. The nominal concentration of DEET and other isomers is 4.2% x 95.5% or 4.01%. The label or the CSF should be revised so that the label claim agrees with the nominal concentration of the two ingredients.

c. Under Directions for Use change "Do not spray in eyes." to "Do not spray in eyes or on genitalia."

Similarly, under Precautionary Statements, change "Avoid spraying in eyes." to "Do not spray in eyes or on genitalia."

d. Since this product is in toxicity category III in terms of its dermal LD<sub>50</sub> and primary eye irritation potentials, revise the Precautionary Statements and Statement of Practical Treatment as follows:

**Precautionary Statements  
Hazards to Humans and Domestic Animals**

Avoid spraying in eyes. Avoid prolonged contact with skin. Wear protective gloves or mitts when applying spray and do not pet animal until spray has dried. Apply spray in a well ventilated area. Avoid inhalation of spray. Do not use on pregnant dogs or puppies less than three months old. Do not use this or any other pesticide on sick, old or debilitated pets... (etc.)

**Statement of Practical Treatment**

IF IN EYES: Immediately flush with plenty of water. Get medical attention if irritation persists.

IF ON SKIN: Wash with of soap and water. Get medical attention if irritation develops or persists.

f. Include the statement "Do not contaminate water, food, or feed." under Storage and Disposal statement also.

g. Include the company street address or P.O. Box number with the name and address.

3. The pH of the concentrate of the pressurized product is 3.5 to 4.0. The CSF should be revised to reflect this.

4. Submit five copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records.

Net Wt. 7 oz 198 g

• repels and kills fleas • repels and kills ticks including the Deer Tick, carrier of Lyme Disease • repels mosquitoes • helps effectively reduce flea and tick infestations which reduce itching and scratching.

Hartz Flea and Tick Repellent prevents these pests from actually living on your dog. In laboratory and field tests, animals treated with this spray repelled fleas and ticks for up to 21 days. In areas of extremely heavy infestations, it may be necessary to spray more frequently. This spray may also be used on pets infested with fleas or ticks in order to kill these parasites within several hours.

**DIRECTIONS FOR USE**  
 It is a violation of Federal law to use this product in a manner inconsistent with its labeling.  
 To repel fleas and ticks, hold container 6 to 10 inches from animal and spray over entire body, including feet and tail. Do not spray in eyes. Apply lightly. Do not saturate animal's coat. Spray approximately two seconds for each pound of pet's body weight. For best results, direct spray against the natural lay of the fur to cause fluffing of the coat. Do not apply more often than every seven days. In periods of

heavy infestations, occasional or ticks may be seen on the bed. For added protection, the bedding, quarters and surrounding area should also be sprayed and kept damp to help prevent reinfestation. For continuous control use Hartz 2 in 1® Collar on your pet in addition to use of this spray. Do not use other pet, household insecticides when using this product.

**STORAGE AND DISPOSAL:** Store in original container and put in trash. Do not puncture or incinerate container.

**PRECAUTIONARY STATEMENTS**  
 Hazards to Humans & Domestic Animals

**CAUTION:** Apply spray in a well-ventilated area. Avoid inhalation. Avoid spraying in eyes. Do not use on animal until spray has dried. Do not practice to wash hands after use. Do not contaminate water or food. Do not use on young fleas less than 1 month old puppies. Do not use on any other pesticide on tick infested pets. Some animals may be sensitive to ingredients in other pesticide products. Pet should be observed following treatment. Do not bathe pet with medicated shampoo. If symptoms do not subside within one hour, consult your veterinarian.

Physical and Chemical Hazards: Contents under pressure. Do not store near heat or open flame. Do not puncture or incinerate. Exposure to temperatures above 130°F may cause bursting.  
**STATEMENT OF PRACTICAL USE:** If in eyes: Rinse eyes with water. Call a physician if irritation persists.

Unconditional money-back guarantee.
