3. Dotted lines, or a single line (s) must connect the percent and the chemical names in your ingredient statements, both, "Active Ingredient and Inert Ingredient" statements.

4. This product needs to have a "Storage" statement as well as the "Disposal" statement, and the heading must be of the same type size permanence as the "Disposal" statement.

NOTE: It is preferable to have the labeling ingredient statements appear on the front panel of the label near the top of the page.

5. Submit five (5) copies of your revised final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

kills the Deer Tick, which may carry Lyme Disease

kills the Rocky Mountain Wood Tick, which may carry Rocky Mountain Spotted Fever

(with deodorant)

continuous protection

contains one collar (for all size dogs, cats) (fits necks up to ---inches)

satisfaction guaranteed money back guarantee

Rabon is a registered trademark for Tetrachlorvinphos.
vIGRen is a registered trademark of Sandoz Ltd.

ACTIVE INGREDIENTS:	By Weight (Nom.)
Tetrachlorvinphos: 2-Chloro-1-(2,4,5-trichlorophenyl) vinyl dimethyl phosphate	14.55%
(S)-Methoprene: Isopropyl (2E, 4E, 7S)-11-methoxy-3,7,11-trimethyl-2,4-dodecadienoate	1.02%
INERT INGREDIENTS:	84.43%

CAUTION: Do not let children play with this collar.

CONTENTS: 1 (color designation) collar, Net Wt. (Ranges from 10g to 50g depending on animal for use)

BACK PANEL

(optional wording)

HARTZ RABON COLLAR WITH METHOPRENE

(Step B - Protect Your Pet)

(IMPORTANT INFORMATION - THE ABC'S OF FLEA AND TICK CONTROL)

(Control products are designed to work together in a complete insecticidal system. For total control of fleas and ticks, it is necessary to treat not only the pet but also its surrounding environment. Use Control products to follow these simple ABC's for control of fleas and ticks on your pet and around your home.)

(Step A - TREAT YOUR PET with one of the Control on-animal products such as Conditioning Shampoos, Dip, Powder or Spray. Use a Control product containing vIGRen[®] an Insect Growth Regulator (I.G.R) to also stop hatching flea eggs from developing into biting adults.)

(Step B - PROTECT YOUR PET with a Control repellent or flea and tick collar to keep fleas and ticks from reinfesting your pet. The Control collar with IGR will also prevent flea eggs from hatching.)

(Step C - TREAT YOUR HOME, both indoors and outdoors, with Control home spray and fogger and Control yard spray to protect your entire home and guard against reinfestation.)

(Be sure to read full directions and precautions on the label of each product you use.)

[The Hartz Rabon Collar with Methoprene contains both (an insecticide to kill adult fleas and ticks and an insect growth regulator (IGR) to kill flea eggs before they hatch.) (a powerful, effective insecticide which kills adult fleas and ticks, and a long lasting insect growth regulator which prevents flea eggs and larvae from maturing into adults.)) (Adult fleas spend virtually all of their time on your pet, but they produce vast numbers of eggs which drop off the pet and develop in the environment.) (Once fleas are apparent on your pet, there is already an infestation of their pre-adult stages in your home.) (Normal insecticides will not kill the flea eggs. But the Hartz Rabon Collar with Methoprene is designed to kill both the adult flea and its eggs and larvae, thereby breaking the flea life cycle.) (The collar will also break the tick life cycle by killing adult ticks, including the Deer Tick, which may carry Lyme Disease, and the Rocky Mountain Wood Tick, which may carry Rocky Mountain Spotted Fever.)

BACK PANEL - continued

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

REMOVE COLLAR FROM PACKAGE , UNROLL AND STRETCH TO ACTIVATE (INSECTICIDE GENERATOR). (AS THE COLLAR BEGINS TO WORK, A FINE WHITE POWDER WILL APPEAR ON THE SURFACE.)

It is not advisable to use this or similar pesticides on (puppies) (kittens) less than 6 weeks old. Do not unroll collar until ready to use. Place the Hartz Rabon Collar with Methoprene around the dog's (cat's, puppy's, kitten's) neck, adjust for proper fit and buckle in place. The collar must be worn loosely to allow for growth of the animal and to permit the collar to move about the neck. A properly fitted collar is one that, when fastened, will snugly slide over the pet's head. Leave 2 or 3 inches on the collar for extra adjustment and cut off and dispose of the extra length. Some animals may become irritated if the collar is applied too tightly. If this occurs, loosen the collar. If irritation continues, remove the collar from the animal. This collar is intended for use only as an insecticide/IGR generator.

The collar will begin to kill fleas, ticks, and flea eggs and larvae immediately. It's full protection against harder to kill ticks will be built up within a few days after being placed on the pet. For continuous protection under normal conditions, replace the collar every 7 months. Under conditions where pets are exposed to severe flea or tick infestations, it may be necessary to replace the collar more frequently. Wetting will not impair the collar's effectiveness or the pet's protection. If the pet goes swimming or is out in the rain, it is not necessary to remove the collar. The Hartz Rabon Collar with Methoprene may be worn with a regular collar.

DISPOSAL: Do not reuse empty pouch. Dispose in trash collection.

(Unconditional Money-Back Guarantee. For more information about flea and tick problems and how to solve them, call 1-800-XXX-XXXX, weekdays, 9am to 5pm Eastern time.)
