HARTZ RABON SPRAY
WITH METHOPRENE PUMP
FORMULATION

Name and Address of Registrant (include ZIP Code):

THE HARTZ MOUNTAIN CORPORATION
700 FRANK E. ROGERS BLVD, SO. HARRISON, NJ 07029

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Make the following label changes:

a. Revise the EPA Registration Number to read, "EPA Reg. No. 2596-140".

HARTZ RABON SPRAY WITH METHOPRENE (Step A - Treat Your Pet)
(Step B - Protect Your Pet)

(IMPORTANT INFORMATION - THE ABC'S OF FLEA AND TICK CONTROL)

(Control products are designed to work together in a complete insecticidal system. For total control of fleas and ticks, it is necessary to treat not only the pet but also its surrounding environment. Use Control products to follow these simple ABC's for control of fleas and ticks on your pet and around your home.)

(Step A - TREAT YOUR PET with one of the Control on animal products such as Conditioning Shampoo, Dip, Powder or Spray. Use a Control product containing vIGRen[®] an Insect Growth Regulator (I.G.R.) to also stop hatching flea eggs from developing into biting adults.)

(Step B - PROTECT YOUR PET with a Control repellent or flea and tick collar to keep fleas and ticks from reinfesting your pet. The Control collar with IGR will also prevent flea eggs from hatching.)

(Step C - TREAT YOUR HOME, both indoors and outdoors, with Control home spray and fogger and Control yard sprays to protect your home and guard against reinfestation.)

(Be sure to read full directions and precautions on the label of each product you use.)

[Hartz Rabon Spray with Methoprene contains both (an insecticide to kill and repel adult fleas and ticks and an insect growth regulator (IGR) to kill flea eggs before they hatch.) (a powerful, effective insecticide which kills and repels adult fleas and ticks, and a long lasting insect growth regulator which prevents flea eggs and larvae from maturing into adults.)) (Adult fleas spend virtually all of their time on your pet, but they produce vast numbers of eggs which drop off the pet and develop in the environment.) [Hartz Rabon Spray with Methoprene kills flea eggs (and larvae) before they drop off your pet.] (Once fleas are apparent on your pet, there is already an infestation of their pre-adult stages in your home.) (Normal insecticides will not kill the flea eggs. But Hartz Rabon Spray with Methoprene is designed to kill both the adult flea and its eggs and larvae, thereby breaking the flea life cycle.) (The spray will also break the tick life cycle by killing adult ticks, including the Deer Tick, which may carry Lyme Disease, and the Rocky Mountain Wood Tick, which may carry Rocky Mountain Spotted Fever.) (A gentle fine mist spray for animals who don't like aerosols.)

(optional wording)

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USE: To kill and repel fleas, ticks and lice (for 7 days) (for 1 week), (thereby reducing incidence of itching and scratching) and to kill flea eggs and prevent their hatching for 1 month (28 days) (4 weeks), hold container upright 6 inches from the animal and spray lightly over the entire body, pressing dispenser with quick short strokes. Move bottle to get even coverage of coat (until tips of hair are moist). Do not spray in eyes. Apply lightly and rub into coat. Ruffle hair for spray to reach skin. Once sprayed, fleas will be killed within 5 to 10 minutes. Ticks are tough - spray directly. After 10 minutes, dry animal with towel. Comb and brush coat. In addition to controlling fleas and ticks, this product leaves your pet's coat soft, glossy and manageable.

Under normal circumstances, to kill (adult) fleas and ticks, repeat spray once every few days until infestation is brought under control, then repeat as necessary. For more prolonged flea and tick control, the animal's bedding, quarters and surrounding area should also be sprayed lightly until damp to help prevent reinfestation.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage and disposal. Do not re-use empty container. Wrap empty container and put in trash collection.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS - CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands and exposed skin thoroughly with soap and water after handling. It is not advisable to use this product or similar pesticides on puppies or kittens less than 6 weeks of age.

STATEMENT OF PRACTICAL TREATMENT If in Eyes: Rinse eyes with plenty of water. Call a physician if irritation persists.

(Unconditional Money-Back Guarantee. For more information about flea and tick problems and how to solve them, call 1-800-XXX-XXXX, weekdays, 9am to 5pm Eastern time.)
