

## OFFICE OF CHEMICAL SAFETY AND POLLUTION PREVENTION

WASHINGTON, D.C. 20460

September 29, 2025

Anna McGrath  
Senior Regulatory Affairs Specialist  
The Hartz Mountain Corporation  
400 Plaza Dr. Secaucus, NJ 07094

Subject: Label Amendment – Addition of registration review interim decision label language for etofenprox and pyriproxyfen and revised directions for use  
Product Name: Hartz Reference #135  
EPA Registration Number: 2596-168  
Application Date: 08/21/2024; 05/07/2024; 04/05/2024  
Case Number: 632440; 642054; 642056

Dear Anna McGrath:

The application referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable under FIFRA Section 3(c)(7)(A), subject to the following conditions:

1. You must submit and/or cite all data required for registration/reregistration/registration review of your product under FIFRA when the Agency requires all registrants of similar products to submit such data.
2. This registration is time-limited and expires two years from the date of this letter.
3. You must submit quarterly enhanced incident reports and quarterly sales information in doses sold for this product beginning within 3 months of the date the product is first released for shipment, on the first day of the quarter (i.e., January 1, April 1, July 1, or October 1). Please flag any Confidential Business Information as such. Submit enhanced incident reporting and quarterly sales information to the Product Manager's attention. The following is a list of information that must be included in the quarterly reports for each incident:
  - EPA Registration Number
  - Product name (brand name)
  - Lot #

- Where purchased: internet, store, veterinarian
  - Active Ingredient(s)
  - Weight range for product
  - Date on which incident occurred. (mm/dd/yyyy)
  - State in which the incident occurred. (standard 2 letter abbreviation)
  - Registrant case #
  - Species: dog, cat, other (specify)
  - Breed: (as reported by pet owner)
  - Age: months or years
  - Sex: M, F, or neutered
  - Weight: pounds
  - Primary Route of Exposure: dermal, oral, other animal, inhalation, other
  - Body System: neurological, dermatological, GI, respiratory, ocular, other
  - Major signs noted with separate column for each sign, using standard terminology
  - Time to Onset: (hours, days)
  - Treated by veterinarian: yes or no
  - First time product used: yes or no
  - Misuse: use on incorrect species, overdose, too frequent dosing, other (describe)
  - Any known precondition
  - EPA Severity Code: death, major, moderate, minor
  - Outcome: died, recovered, still treated, unknown
4. Along with the enhanced incident reporting, you must submit an analysis of the incidents seen, to include the following details:
- All incidents should be reported including all minor dermal and ocular irritation reports.
  - Summary table for dogs showing number of incidents of each severity code for each route of exposure. Each incident should only be reported once. If one incident has several routes of exposure, the order should be ocular > oral > dermal. In other words, an incident with both oral and dermal exposure would be reported as oral exposure, and an incident with both ocular and oral exposure would be reported as ocular exposure.
  - A similar summary table for cats (misuse or secondary exposure) showing number of incidents of each severity code for each route of exposure.
  - Summary table for cats and table for dogs showing number of incidents that are believed due to secondary exposure (e.g., multi-pet households).
  - A summary table for dogs showing number of incidents for each severity code for these age ranges: <3 months, 3-6 months, 6-9 months, 9-12 months, 1 yr, 2 yr, 3 yr, 4 yr, 5 yr, 6 yr, 7 yr, 8 yr, 9 yr, 10 yr, 11 yr, 12 yr, 13 yr, 14 yr, 15 yr, >15 yr.

- A summary table showing the number of dogs incidents for each severity code for each pet weight range on the product label, as applicable.
- A summary table for dog weight showing number of incidents for each product weight range. This table should show number of incidents in dogs weighing less than that product weight range, number of incidents in dogs in lower half of weight range, number of incidents in dogs in upper half of weight range, and dogs weighing more than the product weight range, as applicable.
- Table showing number of incidents for each dog breed, where provided.
- Table showing number of incidents in dogs for each clinical sign.
- Table showing number of incidents in dogs for each organ system.
- Report aggregate incidents, but do not combine moderate and minor incidents.

If EPA determines that future mitigation measures are necessary for all pet spot-ons, the Agency will inform registrants. If mitigation measures are necessary, EPA may take regulatory action.

5. You are required to comply with the data requirements described in the DCIs identified below:

- a. n-octyl bicycloheptene dicarboximide (MGK 264) GDCI- 057001-1224
- b. n-octyl bicycloheptene dicarboximide (MGK 264) GDCI- 057001-1851

You must comply with all of the data requirements within the established deadlines. If you have questions about the Generic DCIs listed above, you may contact the Chemical Review Manager in the Pesticide Reevaluation Division:

[http://www.epa.gov/oppsrrd1/contacts\\_prd.htm](http://www.epa.gov/oppsrrd1/contacts_prd.htm)

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. The next label printing of this product must use this labeling unless subsequent changes have been approved. You must submit one (1) copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on

the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

The Agency, in accordance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, has completed reviewing all of the information submitted with your application to support the Registration Review of the above referenced product in connection with the etofenprox and pyriproxyfen Interim Decisions, and has concluded that your submission is acceptable.

Your release for shipment of the product constitutes acceptance of these conditions. If you fail to satisfy these data requirements, EPA will consider appropriate regulatory action including, among other things, cancellation under FIFRA section 6(e). If you have any questions, you may contact Robert Mitchell at 202-566-2842 or via email at [mitchell.robert@epa.gov](mailto:mitchell.robert@epa.gov).

Sincerely,

A handwritten signature in black ink, appearing to read "Elizabeth Fertich".

Elizabeth Fertich, Product Manager 04  
Invertebrate & Vertebrate Branch 1  
Registration Division (7505P)  
Office of Pesticide Programs

### **PRECAUTIONARY STATEMENTS**

#### **HAZARDS TO HUMANS**

**CAUTION:** Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using toilet. Remove and wash contaminated clothing before reuse.

#### **HAZARDS TO DOMESTIC ANIMALS**

##### **FOR EXTERNAL USE ONLY. DO NOT USE ON ANIMALS OTHER THAN DOGS.**

Do not use on dogs or puppies less than 12 weeks old and weighing less than 5 [15] [31] [61] lbs. Do not use this product on debilitated, aged, medicated, pregnant or nursing dogs or on dogs known to be sensitive to pesticide products without first consulting a veterinarian. Sensitivity, such as slight transitory redness of the skin at the site of application, may occur after using ANY pesticide product for dogs. If signs of sensitivity occur, bathe your dog with mild soap, rinse with large amounts of water, and consult a veterinarian immediately. Dogs may experience some temporary irritation at the site of product application. This product is not a substitute for prescribed heartworm preventative.

#### **ENVIRONMENTAL HAZARDS**

This product is toxic to fish. This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates. Do not add directly to water. Do not contaminate water when disposing of product or packaging.

*{Note to Reviewer: [Optional/alternate text in brackets]; {Administrative text in braces contain notes to reviewer that are not intended for printing}; (Text in parenthesis will appear on final marketplace label.)}*

---

### **FIRST AID**

**If in eyes** • Hold eye open and rinse slowly and gently with water for 15-20 minutes.

- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

**HOT LINE NUMBER:** Have the product container or label with you when calling a poison control center, doctor or veterinarian, or going for treatment. For additional information on this pesticide product (including health concerns or pesticide incidents), you may call 1-800-275-1414, twenty-four (24) hours per day, seven (7) days per week.

### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For Indoor use only. Application of product on pets must only be done indoors.

IMPORTANT! READ ENTIRE LABEL BEFORE EACH USE.

#### **USE RESTRICTIONS:**

DO NOT ALLOW CHILDREN TO APPLY PRODUCT.

DO NOT USE ON DOGS OR PUPPIES 12 WEEKS OF AGE WEIGHING LESS THAN 5 [15] [31] [61] LBS.

DO NOT ALLOW YOUR DOG/PUPPY TO INGEST THIS PRODUCT.

DO NOT EXCEED LABELED DOSAGE AMOUNT FOR DOGS.

DO NOT APPLY MORE THAN ONE TUBE PER TREATMENT REGARDLESS OF DOG'S WEIGHT.

DO NOT HAVE CONTACT OR ALLOW CHILDREN TO HAVE CONTACT WITH TREATED AREA UNTIL COMPLETELY DRY.

DO NOT USE ON CATS, RABBITS AND ANIMALS OTHER THAN DOGS.

DO NOT REAPPLY *{insert Alternate Brand Name}* FOR 28 DAYS [30 DAYS] [4 WEEKS] [1 MONTH]

*{The application steps below may optionally be numbered or bulleted to clarify the order, depending on the final physical layout of the label but the wording will be identical.}*

*{When referring to the application device (i.e., "applicator tube", "tube", etc.) only one term will be selected and used throughout the entire label.}*

#### ***{Option 1}***

Dog should be dry and standing at time of application. Dog should remain dry and not bathed for 48 hours after application for best performance. Remove one applicator tube [tube] from the package and hold in an upright position pointed away from your face. Pull off cap. Turn the cap around and place on top of applicator tube [tube]. Simply press cap down to break the seal of the tube. Remove cap

*{Note to Reviewer: [Optional/alternate text in brackets]; {Administrative text in braces contain notes to reviewer that are not intended for printing}; (Text in parenthesis will appear on final marketplace label.)}*

carefully. Position the tip of the applicator tube [tube] on the dog's back between the shoulder blades. Use the tip of the applicator tube [tube] to part the dog's hair so that the product will be applied at skin level. Begin squeezing out the contents of the applicator tube [tube] to form a stripe as you move from the shoulder blades along the dog's back to the base of the tail. Repeat every month. Separate treated dog from other dogs, cats and pets for 24 hours after treatment has been applied.

***{Option 2}***

Dog should be dry and standing at time of application. Dog should remain dry and not bathed for 48 hours after application for best performance . Remove one applicator tube [tube] from the package and hold in an upright position pointed away from your face. Twist dispensing tip clockwise about ½ turn while pushing down to break the applicator tube's [tube's] seal. Do not remove the dispensing tip. Position the dispensing tip on the dog's back between the shoulder blades. Use the dispensing tip of the applicator tube [tube] to part the dog's hair so that the product will be applied at skin level. Begin squeezing out the contents of the applicator tube [tube] to form a stripe as you move [glide] from the shoulder blades along the dog's back to the base of the tail. Repeat every month. Separate treated dog from other dogs, cats and pets for 24 hours after treatment has been applied.

***{Option 3}***

Dog should be dry and standing at time of application. Dog should remain dry and not bathed for 48 hours after application for best performance . Remove one applicator tube [tube] from the package and hold in an upright position pointed away from your face. Pull off cap. Turn the cap around and place on top of applicator tube [tube]. Simply press cap down to break the seal of the applicator tube [tube]. Remove cap carefully. Position the tip of the applicator tube [tube] on the dog's back at the base of the dog's tail. Use the tip of the applicator tube [tube] to part the dog's hair so that the product will be applied at skin level. Begin squeezing out the contents of the applicator tube [tube] to form a stripe as you move from the base of the tail along the dog's back to the shoulder blades. Repeat every month. Separate treated dog from other dogs and cats [pets] for 24 hours after treatment has been applied.

***{Option 4}***

Dog should be dry and standing at time of application. Dog should remain dry and not bathed for 48 hours after application for best performance . Remove one applicator tube [tube] from the package and hold in an upright position pointed away from your face. Twist dispensing tip clockwise about ½ turn while pushing down to break the applicator tube's [tube's] seal. Do not remove the dispensing tip. Position the dispensing tip on the dog's back at the base of the dog's tail. Use the dispensing tip of the applicator tube [tube] to part the dog's hair so that the product will be applied at skin level. Begin squeezing out the contents of the applicator tube [tube] to form a stripe as you move [glide] from the base of the tail along the dog's back to the shoulder blades. Repeat every month. Separate treated dog from other dogs and cats [pets] for 24 hours after treatment has been applied.

*{Note to Reviewer: [Optional/alternate text in brackets]; {Administrative text in braces contain notes to reviewer that are not intended for printing}; (Text in parenthesis will appear on final marketplace label.)}*

---

***{Option 5 – Neck to Tail}***

1. Dog should be dry and standing at time of application. Dog should remain dry and not bathed for 48 hours after application for best performance
2. Remove one applicator tube [tube] from the package and hold in an upright position [at the neck of the tube] pointed away from your face.
3. Lift the handle [lever] [at the neck of the tube] in an upward motion to separate from [the body of] the tube.
4. Position the tip of the tube on the dog's back at the base of the dog's neck between the shoulder blades. Use the tip of the tube to part the dog's hair so that the product will be applied at the skin level [to the skin].
5. Begin squeezing out the contents of the tube to form a stripe as you move from the base of the neck, along the dog's back to the tail.
6. Repeat every month [30 days] [4 weeks].

***Option 6 – Neck to Tail with Applicator Tapping instructions}***

1. Dog should be dry and standing at time of application. Dog should remain dry and not bathed for 48 hours after application for best performance .
2. Remove one applicator tube [tube] from the package and hold in an upright position [at the neck of the tube] pointed away from your face.
3. Tap applicator tube [tube] to settle liquid into the sealed end of the tube.
4. Lift the handle [lever] [at the neck of the tube] in an upward motion to separate from [the body of] the tube.
5. Position the tip of the tube on the dog's back at the base of the dog's neck between the shoulder blades. Use the tip of the tube to part the dog's hair so that the product will be applied at the skin level [to the skin].
6. Begin squeezing out the contents of the tube to form a stripe as you move from the base of the neck, along the dog's back to the tail.
7. Repeat every month [30 days] [4 weeks].

*{Note to Reviewer: Below images refer to step 3, tapping applicator.}*

*{Note to Reviewer: [Optional/alternate text in brackets]; {Administrative text in braces contain notes to reviewer that are not intended for printing}; (Text in parenthesis will appear on final marketplace label.)}*

***{Option 7 – Tail to Neck}***

1. Dog should be dry and standing at time of application. Dog should remain dry and not bathed for 48 hours after application for best performance
2. Remove one applicator tube [tube] from the package and hold in an upright position [at the neck of the tube] pointed away from your face.
3. Lift the handle [lever] [at the neck of the tube] in an upward motion to separate from [the body of] the tube.
4. Position the tip of the tube on the dog's back at the base of the dog's tail. Use the tip of the tube to part the dog's hair so that the product will be applied at the skin level [to the skin].
5. Begin squeezing out the contents of the tube to form a stripe as you move from the base of the tail, along the dog's back to the shoulder blades.
6. Repeat every month [30 days] [4 weeks].

***{Option 8 – Tail to Neck with Applicator Tapping instructions}***

1. Dog should be dry and standing at time of application. Dog should remain dry and not bathed for 48 hours after application for best performance .
2. Remove one applicator tube [tube] from the package and hold in an upright position [at the neck of the tube] pointed away from your face.
3. Tap applicator tube [tube] to settle liquid into the sealed end of the tube.
4. Lift the handle [lever] [at the neck of the tube] in an upward motion to separate from [the body of] the tube.
5. Position the tip of the tube on the dog's back at the base of the dog's tail. Use the tip of the tube to part the dog's hair so that the product will be applied at the skin level [to the skin].
6. Begin squeezing out the contents of the tube to form a stripe as you move from the base of the tail, along the dog's back to the shoulder blades.
7. Repeat every month [30 days] [4 weeks].

*{Note to Reviewer: Below images refer to step 3, tapping applicator.}*

*{Note to Reviewer: [Optional/alternate text in brackets]; {Administrative text in braces contain notes to reviewer that are not intended for printing}; (Text in parenthesis will appear on final marketplace label.)}*

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Keep this product in its tightly closed original container, when not in use. Store in a cool, dry (preferably locked) area that is inaccessible to children and animals.

**PESTICIDE DISPOSAL & CONTAINER HANDLING:** Call your local solid waste agency for local disposal options.

Non-refillable container. Do not reuse or refill container. *If empty:* Offer for recycling if available. *If partly filled:* Call your local solid waste agency for disposal instructions. Do not pour or dispose down the drain or sewer. Never place unused product down any indoor or outdoor drain.

*{ Note to Reviewer: A box labeled “Side Effects” will be immediately above the cat warning box on the back panel.}*

**Side Effects:** Monitor your dog after application. Side effects may include signs of skin irritation such as redness, scratching, or other signs of discomfort. Gastrointestinal signs such as vomiting or diarrhea have also been reported. If these or other side effects occur, consult your veterinarian or call 1-800-275-1414.

*{Cat Warning Icon: A cat prohibition icon and warning text in a box will appear on the back panel, lower right corner. Icon is 1.5 cm x 1.5 cm black image on a yellow background. The following text will be below or adjacent to the icon.}*

**DO NOT USE ON CATS.** Keep cats away from treated dogs for 24 hours. If applied to a cat or ingested by a cat, contact your veterinarian. For more information call our [flea and tick] experts at 1-800-275-1414 (weekdays 9 a.m. – 5 p.m. E.S.T.)

*{Note to Reviewer: [Optional/alternate text in brackets]; {Administrative text in braces contain notes to reviewer that are not intended for printing}; (Text in parenthesis will appear on final marketplace label.)}*

---

**{INDIVIDUAL TUBE TEXT}**

*{Product name on applicator tube (i.e. tube) will be followed by weight and age limits of dog for which the applicator tube (i.e. tube) is intended.}*
