FORMULATORS OF QUALITY  
SOAPS, DISINFECTANTS,

CLEANERS, AND SPECIALTY  
CHEMICALS SINCE 1922

### DIRECTIONS

For young trees, thin-barked trees, avocados, and citrus trees, tie a band of several thicknesses of heavy paper about four inches wide around the trunk or branch of the tree or vine. Then put a thin layer of STIKEM SPECIAL around the center of the band about two inches wide, leaving a clear space between the material and the bark.

For a rough-barked tree or vine, scrape off the loose bark to form a smooth surface but do not scrape into live tissue. Protect the remaining smoothed bark first with a thin coat of shellac, then apply a thin layer of STIKEM SPECIAL about two inches wide around the clear and dry shellacked surface of the tree. If the band of STIKEM SPECIAL becomes dirty, use the point of a stick or knife to scrape it down and around to renew the surface.

### A STICKY COMPOUND FOR TREES, VINES, AND INSECT TRAPS

STIKEM SPECIAL is used for the protection of trees and vines against many climbing and creeping insects such as: Canker Worms, Climbing Worms, Caterpillars, and Ants. The sticky qualities of STIKEM SPECIAL remain in effect for many months after application.

**WARNING! KEEP OUT OF REACH OF CHILDREN  
SEE OTHER PRECAUTIONS ON THE SIDE PANEL.**

**CONTENTS: 7½ lbs**

For insect traps, apply a layer of STIKEM SPECIAL approximately one to two millimeters thick.

One pound of STIKEM SPECIAL covers five square feet of surface to an average depth of one sixteenth to one eighth inches.

Apply STIKEM SPECIAL with spatula, or wooden paddle. To remove excess from hands and tools, use cleaning solvent or turpentine spirits.

### CAUTION

Do not dilute the STIKEM SPECIAL with oils or solvents.

Do not apply directly to the bark of young trees or thin-barked trees as it may injure them. As the use of STIKEM SPECIAL is beyond our control, we do not make any warranty of any kind regarding results of use.
