

Sir John[®]

FOR TOILET BOWLS & UPRIGHT URINALS

Removes rust, lime and stubborn stains ordinary cleaners couldn't begin to do. Sir John's effective control helps to kill many bacteria and micro-organisms from crevices.

DIRECTIONS:

Residual toilet bowl water must be removed and/or expelled over the trap prior to the application of Sir John.

For toilet bowls and/or urinals: Flip up dispenser, apply to area to be cleaned and squeeze bottle. Sir John clings to hard to get at places and will not run down vertical surfaces. Spread over area to be cleaned with a swab or bowl brush. Allow to stand until lime and rust is loosened, then flush away.

For toilet bowls, force water down trap and cover area to be cleaned with Sir John.

DANGER — POISON

DANGER: Contains hydrochloric acid. Do not breathe vapor or fumes.

ANTIDOTE: If taken internally, drink chalk whiting, wall plaster or small pieces of soap softened in water, in milk, mucilage, or raw egg white. Call physician. For external burns, wipe off the acid gently. Immediately flood the surface with water using soap freely, then cover with moist magnesia or baking soda.
