REC 11-28-73

ACCEPTED
NOV. 26, 1973

Initial Dose

Apply 0.4 to 0.8 pints of BIOSPERSE 284 (50-100 ppm) per each 1000 gallons of water in the system. This dose may be repeated once, twice or three times weekly or as required to control the growth of slime-forming organisms.

Subsequent Dose

When microbial control is evident add 0.1 to 0.48 pints of BIOSPERSE 284 (12.5-60 ppm) per 1000 gallons of water in the system every three days or as needed to maintain good control.

Air Washers

In treating air washer systems, preclean by introducing a suitable detergent solution into the system and allow air washer to run with fan off for two (2) hours. Flush, check all nozzles and manually clean those that are plugged. Add product as specified under dosages for cooling towers.

FEEDING

BIOSPERSE 284 may be fed directly from the drum or diluted with water and fed by any suitable feed system. BIOSPERSE 284 should be dosed directly into the sump or basin or any other location where good distribution can be assured.

Specific feeding points, equipment and schedules will be recommended by your Drew Representative for your particular application.

HANDLING

BIOSPERSE 284 is a toxic material. Causes skin and eye irritation. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wash thoroughly after handling. In case of swallowing, induce vomiting by administering warm salt water or other emetic. Call a physician.

ENVIRONMENTAL CAUTION

This product is toxic to fish and wildlife.

Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water.

Do not contaminate water by cleaning of equipment or disposal of wastes.

Apply this product only as specified in this Product Data Sheet (BIOSPERSE 284).
