DIRECTIONS FOR USE

**ROACHES, WATERBUGS & SILVERFISH**  
Spray liberally into all cracks, holes, crevices, dark corners, behind baseboards, moldings, pipes, switch-boxes and other hiding places. Thorough and repeated spraying of the infested area, working the spray into cracks and other hiding places is recommended. Emphasis is placed on hitting the insects directly, and on repeated applications.

**FLEAS:** Spray directly on floors, particularly along walls, crevices, and where animals have been kept. Spray bedding and infested rugs. Repeat applications as necessary to insure against their recurrence. Do not apply directly to animals.

**BEDBUGS:** Spray into all cracks and crevices in beds and adjoining walls and floors. Treat bedclothes and mattresses by thorough spraying.

**INSPACE SPRAY APPLICATORS**  
for control of flies, mosquitoes, gnats and certain other small flying insects (Vaporizers, fog machines, etc.): Use at the rate of 1-1/2 ounces per 1,000 cubic feet of space.
