PYRENONE SPACE SPRAY

U.S.D.A. Reg. No. 2666-10

DIRECTIONS FOR USE:

Pyrenone Space Spray kills on contact the exposed stages of flies, mosquitoes, gnats, silverfish, crickets, spiders, scorpions, wasps, hornets, flying moths, boxelder bugs, clover mites and ants.

For best results, use in a good sprayer or atomizer adjusted to deliver a fine mist. Treat infested areas thoroughly and repeat applications as needed. Whenever possible, keep doors and windows closed for 10 minutes after spraying.

In the control of flying insects, direct the spray toward the upper portions of the enclosure and fill the atmosphere with mist, using 2 to 3 ounces to each 1000 cubic feet of space. Against running and crawling pests, where possible apply the spray directly upon these pests, treating all areas where they are commonly found. Direct the liquid behind behind baseboards, moldings, furniture, cabinets, shelves, sinks, pipes, toward drains and dark corners, working the spray into cracks, crevices, recesses and similar hiding places. Treat ant trails and areas around door sills and window frames where they enter. Thorough and repeated spraying of these areas is recommended.

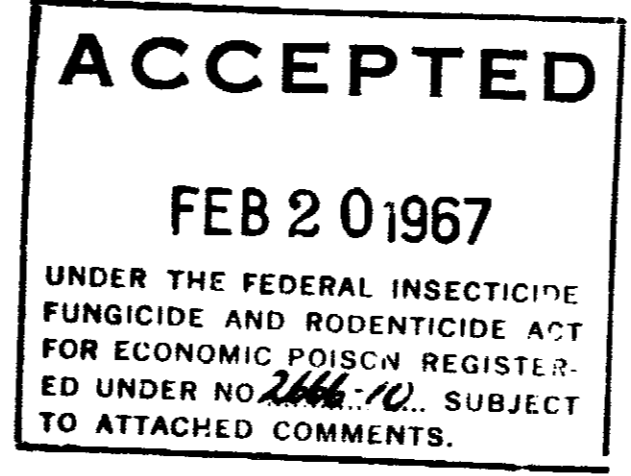

CAUTION - KEEP OUT OF REACH OF CHILDREN. SEE SIDE PANEL FOR ADDITIONAL CAUTIONS.

For the control of flies and certain other insect pests in homes, institutions, restaurants and food plants, and other building.

Active Ingredients 100%
Petroleum distillate
*Technical Piperonyl Butoxide
Pyrethrins

*Consists of (butylcarbityl) (6-propylpiperonyl) ether and related compounds.

Net Contents:

Pyrenone Space Spray containing piperonyl butoxide and pyrethrum is particularly suited for use in food plants, institutions and homes. The synergistic results obtained from such a combination provides a finished insecticide, Cornell Pyrenone Space Spray, with rapid knockdown and excellent mortalities.

CAUTION:

Do not spray into or near open flame. Do not spray directly on food stuffs. Should not be used as a space spray in food processing plants when plant is in operation. Foods should be removed or covered during treatment and food processing surfaces be covered during treatment or washed before use. Harmful if swallowed. Remove Pets, Birds and Fish Bowls before Spraying.
