

2666-42

S-T-FOG BRAND SPACE

Spray used at the rate of 1 ounce per 1,000 cu. ft. kills accessible stages of Flour Moth, Indian Meal Moth, Angoumois Grain Moth, Dried Fruit Beetles and Grain Mites affecting stored grain and food products, and kills Ants, Cock roaches, and Silverfish in storage ware houses and food handling establishments. The proper use of this spray is an excellent adjunct to spot fumigation operations. To obtain the best results in controlling FLYING INSECTS, such as flies, gnats, mosquitoes, close doors and windows create a dense fog in the room and leave the room closed for at least 15 minutes. Food receptacles, kettles and processing equipment should be covered before the room is fogged to keep the dead insects from falling into the equipment. For CRAWLING INSECTS, a heavier fog is necessary to penetrate where the insects may be hiding. It will kill the accessible stages of Ants, Roaches, and Silverfish. It is advisable to thoroughly clean all areas to be sprayed. Avoid direct spraying on any food products. Exposed food should always be covered before fogging operations start.

E.P.A. Reg. No. 2666-42

CORNELL S-T-FOG SPACE SPRAY

CAUTION:

KEEP OUT OF REACH OF CHILDREN. SEE SIDE PANEL FOR ADDITIONAL CAUTIONS

ACCEPTED

Table with 2 columns: ACTIVE INGREDIENTS and Percentage. Includes Pyrethrum, Pyrethrin, and other ingredients.
