# KEMIC FLEA AND TICK POWDER

## DIRECTIONS FOR USE...

The Control of Brown Dog Ticks on dogs, in kennels and other areas is becoming more and more difficult.

KEMIC Flea and Tick Powder has been developed especially to aid in the control of Brown Dog Ticks on dogs and premises. It is also very effective against fleas on dogs and cats. KEMIC checks the growth of skin fungi which cause scratching and odors.

**FOR CONTROL OF TICKS AND FLEAS ON DOGS AND CATS:** Dust powder liberally over the animal and rub thoroughly into the skin. Be sure to apply also to the feet, between the toes, and on the legs. Comb out dead ticks a few hours after treatment. KEMIC may also be used to dust mother cats and young kittens. Repeat at weekly intervals if needed.

**IN KENNELS, DOG HOUSES, ETC.:** Dust in and around sleeping quarters and other areas where ticks and fleas occur.

**CAUTION:** Harmful if swallowed. Avoid breathing dust and repeated contact with skin; wash thoroughly after using. Keep out of reach of children. Minimize treatment of eyes and face; sensitive cats may exhibit temporary and non-harmful salivation.

**NOTICE:** The Manufacturer guarantees that this product consists of the ingredients specified, but makes no other warranty expressed, or implied. Neither the Manufacturer nor the Seller shall be responsible in any manner for any personal injury or property damage or other losses resulting from the handling, storage or use of this material. The buyer shall be deemed to have accepted these conditions.

**ACTIVE INGREDIENTS:** Carberyl (1-naphthyl-N-Methylcarbamate) 5.0%  
2, 2-methylene bis (4-chlorophenol) (Dichlorophene) 0.5%
