TRIX Pet Spray

DIRECTIONS FOR USE

Remove cap and press down plastic button with hole away from you. Hold at a convenient distance from the animal, approximately 6 inches, so that the spray penetrates to the skin. Work from the back of the animal towards the front of the animal, fluffing the hair may help permit the spray to penetrate. Keep the spray moving constantly. Spray only enough that the hair and skin are slightly damp. Wet ticks with spray. Do not allow spray to get in eyes, or on scrotum.

For cats spray on the basis of a 4 to 6 second application for a 5 pound cat; for dogs spray on the basis of 20 to 30 second application for a 25 pound dog. Repeat treatment, if necessary, should not be more often than once weekly. Also treat bedding, interior of kennel and other places where ticks and fleas may be found. The cool sensation caused by the spray, as well as the hissing sound, may temporarily frighten nervous pets. Pets are expected to become accustomed to this treatment.

CAUTION: Avoid breathing of spray mist. Do not contaminate food or water. Wash hands after use. Keep out of reach of children. Minimize treatment of eyes and face; sensitive cats may exhibit temporary and non-harmful salivation. Avoid treatment of or exposure to kittens less than 4 weeks old. Do not store near sources of heat. Do not throw into fire.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling is contrary to label instructions.

ACTIVE INGREDIENTS: Carbaryl (1-Naphthyl Methylcarbamate) 0.5%; Pyrethrins 0.05%; Technical piperonyl butoxide 0.10%; N-octyl bicycloheptene dicarboximide 0.166%; 2,2'-methylene-bis(4-chlorophenol) Dichlorophene 0.1
