VET-KEM

VAPOR BAR

DO NOT OPEN UNTIL READY FOR USE

Controls flies, mosquitoes, gnats and other small flying insects and silverfish.

Use in homes, motels, dairy barns, milk rooms and animal shelters.

DIRECTIONS FOR USE:

Homes - Motels

To control flies, mosquitoes, gnats, other small flying insects and the reduction of silverfish, place one Vet-Kem Vapor Bar per average size room (10 X 10 X 10 feet) or per 100 square feet of floor area. Normally this is effective for three months. Replace strips if effectiveness diminishes. For control of flies in garbage cans attach one Vet-Kem Vapor Bar inside of an average size garbage can (20 gallon capacity). One unit will be effective for the entire fly season. Keep lid on garbage can.

Animal Shelters

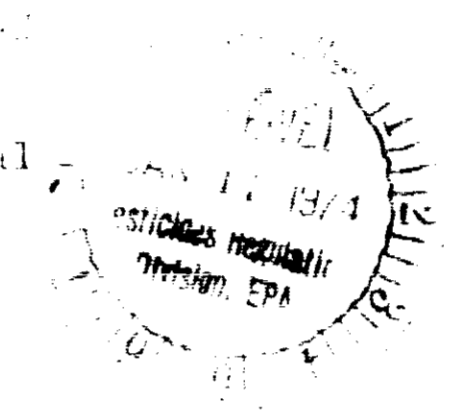

To control flies, mosquitoes, gnats and other small flying insects in Barns, Dairy Barns, Calf Barns, Milk Parlors, Stables, Milk rooms, Pig Parlors, Dog rooms, Poultry houses and other farm buildings, suspend one Vet-Kem Vapor Bar (100 bar = 3.7 oz.) for each 100 square feet of floor area. If more than one bar is required, distribute them equally over area to be treated. In other and other conditions, such as animal quarters, after the first day, the unit should be replaced if not effective for one reason. Replace bar if effectiveness diminishes.

Catch Flies

For the control of house flies, place one Vet-Kem Vapor Bar in each room. Each one should be replaced if not effective for 10 to 15 days. For the control of other flies, use one bar per 100 square feet of floor area.

Notes

Keep this product out of the reach of children. Do not use in areas where food is prepared or served. Do not use in areas where food is stored. Do not use in areas where food is consumed. Do not use in areas where food is prepared or served. Do not use in areas where food is stored. Do not use in areas where food is consumed.
