kemic flea collar

flea collar

SOLD BY VET-KEM LABORATORIES
a ZOECON ~ THURON R. company
12200 DENTON DRIVE DALLAS, TEXAS 75231

Directions for use

Buckle Flea Collar around cat's neck securely but very loosely. Cut off any excess length of collar and dispose of it. THE FLEA COLLAR starts killing fleas as soon as it is placed around cat's neck. The fleas on the cat will be killed and new ones which may temporarily appear on the cat will also be killed during the 3 months collar is worn. Excessive exposure to water reduces effectiveness. Remove if cat is bathed. Replace collar when effectiveness diminishes. Collar must be worn loosely.

ACTIVE INGREDIENTS:

2, 2-dichlorovinyl dimethyl phosphate	4.37%
Related Compounds	0.33%
INERT INGREDIENTS	95.30%

Caution: Do not open inner envelope until ready to use. Do not allow children to play with this collar. Collar is intended for use only as an insecticide generator and is not to be taken internally by man or animals. For use on cats only. Cats occasionally object to wearing a collar. They are also unpredictably sensitive to many

chemicals. In such cases (or if collar is too tight), a neck irritation may result. Should this happen remove collar and permit area to heal. Do not use on sick or convalescing cats. Do not use on Persians. Do not use any other pesticide on cat while Flea Collar is worn. (For fleas on dogs use FLEA COLLAR FOR DOGS.) Animals should not be allowed to chew on the collar. When collar is first worn, observe neck area for irritation every few days.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling is contrary to label instructions.
