

DIRECTIONS FOR USE

THURON FLY BAIT contains MUSCAMONE fly attractant, which encourages flies to remain in the treated area, thus feeding on the bait. Bait should be scattered over specified fly feeding surfaces to provide initial knockdown and reduction of the housefly population.

Use THURON FLY BAIT only around the outside of feed lots, broiler houses, livestock barns, and kennels. This bait may be used on walkways in caged layer houses. Scatter bait at the rate of approximately 1/4 lb. per 500 sq. ft. of fly feeding area. Do not allow food producing animals to have access to treated areas.

CAUTION: Avoid contamination of feed, foodstuffs, and animal quarters. May be harmful if swallowed. Store out of reach of children, poultry and domestic animals. Do not use where milk is stored or processed. Do not use treated garbage for animal feed. Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.

This product is toxic to fish, birds, and other wildlife. Keep out of any body of water. Apply this product only as specified on this label.

Seal in airtight container. Do not use after expiration date. Do not use if other material is on the label. Buyer assumes all risk of use and handling of this material when such use is in violation of label instructions.
