EPA Est. No.

NET CONTENTS

**READ ENTIRE LABEL BEFORE EACH USE
USE ONLY ON DOGS/PUPPIES
[APPLY ONLY 1 COLLAR AT A TIME]**

[ONE SIZE FITS ALL – TRIM TO SIZE

This collar is designed to fit 99% of all dogs. In rare instances (for example, well developed St. Bernards or Mastiffs), the collar may be too short. If found short for your dog, return to address on top panel for full purchase price refund.]

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

1. Buckle collar around dog's/puppy's neck. [Thread flat end of the collar through buckle hole and tighten as necessary, so that at least two ridges are covered by the buckle. Since the plastic buckle is molded into the collar, the possibility of neck irritation and buckle failure is reduced.] Fit collar snug enough to prevent placement of the dog's/puppy's leg or lower jaw through the collar, yet loose enough to be rotated about the neck. [Generally, if used on large dogs, two or three fingers should fit between the collar and dog's/puppy's neck.]
2. Leave 2-3 extra inches on the collar for adjustment, cut off excess length and dispose of in trash.
3. Check periodically and adjust fit if necessary, especially when puppies are rapidly growing.
4. May be used in addition to regular collar. Replace collar when effectiveness diminishes. [To release the collar, squeeze buckle between thumb and finger and pull sharply.]

STORAGE and DISPOSAL: Store in original unopened container away from children. Do not reuse container or reuse collar. Wrap and put in trash.

WHAT TO EXPECT:

For Fleas:

1. This [brand name] collar is designed to kill adult fleas.
2. This collar starts killing fleas as soon as it is placed around dog's/puppy's neck.
3. Protection against fleas will be achieved within a few days, providing continuous protection for up to 5 months [4 months].
4. Replace collar every 5 [4 months] months to help control [prevent] flea infestations on your pet [dog/puppy] and in your home.

For Ticks:

1. Ticks are tougher to kill than fleas and are killed more slowly.
2. Full protection against adult and immature ticks will be achieved within a few days, providing continuous protection for up to 5 months. [for 4 months]
3. Adult ticks will be killed over the entire pet. Dead ticks will fall off or may be easily removed.
4. Replace collar every 5 months [4 months] for continuous protection from ticks. [If your dog/puppy goes swimming or is out in the rain, it is not necessary to remove the collar. The continuous action collar will rapidly replace any flea and tick killing material removed.]

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS-CAUTION: Do not get dust or collar in mouth, harmful if swallowed. Do not get dust in eyes, will cause temporary pupillary constriction.* The dust released by this collar is a cholinesterase inhibitor.

Humans: Do not open package until ready to use. Do not allow children to handle this collar. Dust will form on this collar during storage. Wash hands thoroughly with soap and water after handling collar.

4/14

Animals: Consult a veterinarian before using this product on debilitated, aged, medicated, pregnant, or nursing dogs. Do not use on puppies under 12 weeks of age. Do not use this product on dogs simultaneously or within 30 days before or after treatment with or exposure to cholinesterase inhibiting drugs, pesticides, or chemicals. However, flea and tick collars may be immediately replaced. When collar is first worn, observe neck area every few days for irritation. Remove collar at the first sign of irritation or adverse reaction. Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur, remove collar and bathe your pet with mild soap and rinse with large amounts of water.

FIRST AID: If **swallowed**, call physician, veterinarian, or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. If person is unconscious, do not give anything by mouth and do not induce vomiting. If **in eyes**, flush eyes with plenty of water. Get medical attention if irritation persists.

NOTE TO PHYSICIAN/VETERINARIAN: *Atropine and *homatropine are antidotal only if symptoms of cholinesterase inhibition are present.

Seller makes no warranty, express or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling are contrary to label instructions.
