

INSTRUCTIONS TO INVESTIGATORS

FOR EXPERIMENTAL USE ONLY

Supplemental labeling for the Experimental Use of GX-118, EPA Reg. No. 2724-262 on Hogs.

For use only at an application site of a cooperator and in accordance with the terms and conditions of the experimental use permit.

DIRECTIONS FOR USE

The efficacy of GX-118 as a control of hog mange and hog lice will be evaluated as a pour-on and spray at several dilution rates.

Pour-On: Prepare the pour-on solutions by diluting 1 part GX-118 with 2 parts water, 5 parts water and 7 parts water. Stir thoroughly. Apply one ounce of the solution per 100 pounds of body weight down the center line of back. If retreatment is necessary, treat between days 10 and 14 after initial treatment. Treat only twice as necessary.

Spray: Prepare the spray solutions by diluting 1 part GX-118 with 49 parts water and 99 parts water. Stir thoroughly. Apply as a high-pressure spray, taking care to wet the skin. Apply to the point of run-off, or about 1.5 qts. per 400 lb. hog. If retreatment is necessary, treat between days 10 and 14 after initial treatment. Treat only twice as necessary.

Skin irritation and toxicity will be observed during all efficacy trials.

All applicable directions, restrictions, and precautions on the EPA registered label are to be followed.

This label must be in the possession of the user at the time of pesticide application.

EPA Experimental Use Permit No. 2724-EUP-

ACCEPTED
for shipment and use of product for experimental purposes under the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act.
Permit No. <u>2724-EUP-15</u>
Issued on <u>1/22/79</u>
