

JUN 10 1975

Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
it is unlawful for the pesticide
to be used in a manner
EPA Reg. No.

Directions for use: SUPER GOLDEN MALRIN FLY BAIT is an improved fly bait formula containing MUSCAMONE fly attractant which encourages both male and female flies to remain in the treated areas, thus feeding on the bait. This unique sex attractant improves the fly kill many times. Bait should be scattered over specified fly feeding surfaces to provide initial knockdown and reduction of the Housefly population.

Use SUPER GOLDEN MALRIN only around the outside of feed lots, broiler houses, livestock barns, kennels, food processing plants, and restaurants. Bait may be used on walkways in caged layer houses. Scatter bait at the rate of approximately 1/4 lb. per 500 sq. ft. of fly feeding area. Do not allow food producing animals to have access to treated areas.

Caution: Avoid contamination of feed and foodstuffs, and animal quarters. Store this product out of reach of children, poultry and domestic animals. Do not use where milk is stored or processed. Do not use treated garbage for animal feed. Use only in areas inaccessible to food producing animals.

Harmful if swallowed, inhaled, or absorbed through skin. Wash hands, arms, and face with soap and water after handling and before eating or smoking. If swallowed, induce vomiting immediately and get medical attention.

Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.

This product is toxic to fish, birds, and other wildlife. Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling are contrary to label instructions.
