**SUBJECT: Revised Formulation and Changed Use Pattern
Golden Malrin RF-128 Fly Killer
EPA Reg. No. 2724-274
Your October 13, 1995 Application**

Dear Mr. Spaulding:

The Agency has reviewed your October 13, 1995 application for an amendment (OPP Identifier No. 213475) to the registration for the above product. Your October 13 submission contains an application for an amendment and copies of a proposed label. Your submission was a follow-up to your September 26, 1995 meeting with the Agency's Special Review Branch.

The amendment, which is being submitted in connection with registration of the product, Golden Malrin RF-128 Fly Killer, is subject to the following provisions:

Golden Malrin RF-128 Fly Killer - Alternate B, dated November 2, 1992 and forwarded in your October 13 application, will then become the sole, valid formula.

(3) The use of the term "New Blue Color" and "New Improved Formula" is limited to a six month period. Afterwards, you must submit an application for an amendment to the label to remove the term "New."

(4) Delete the front panel label statement "Contains the bittering agent BITREX to help discourage ingestion by humans and pets."

(5) The statement "Not to be used inside or around homes, or any other place where children are likely to be present" should be placed prominently on the label.

(6) The Agency considers milking parlors to be the same category as a food processing facility and, therefore, considers use of the bait station in milk parlors to be inappropriate. Remove "milking parlors" from your label or specify that the bait stations may only be used "outside of milking parlors."

(7) Pursuant to the Office of Pesticide Programs Policy regarding existing stocks, the Agency establishes the following provisions for existing stocks of methomyl fly baits of yellow, or any other unacceptable color:

- Sale of yellow (or any other unacceptable color) fly baits by registrants will be allowed until September 31, 1996.

- Sale of yellow (or any other unacceptable color) fly bait by anyone other than the registrants will be allowed only until December 31, 1997.

) A stamped copy of the label, approved with comments, is enclosed for your records. You must submit the requested information prior to shipment of the revised product. If you have any questions, please contact Taung P. Chin of my Team, at (703) 305-5412.

Sincerely yours,

Product Manager

DIRECTIONS FOR USE: - It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Improved GOLDEN MALRIN [Flytek] Fly Killer is an improved fly bait formula containing MUSCAMONE Fly Attractant which encourages both male and female flies to remain in the treated area, thus feeding on the bait. It may be used daily or as needed to provide initial knockdown and reduction of fly populations.

GOLDEN MALRIN [Flytek] Flykiller may not be used in residential areas, or any other place where children are likely to be present.

SCATTERBAITS:

Use GOLDEN MALRIN [Flytek] Fly Killer as a scatterbait only around the outside of certain commercial agricultural production facilities where children will not be present, specifically feedlots, broiler houses and livestock barns. Bait may be used on walkways in caged layer houses.

GOLDEN MALRIN [Flytek] Fly Killer may also be used as a scatterbait around the outside of the following commercial facilities: canneries, beverage plants, meat and poultry processing plants and other food processing plants.

To apply, dust, distribute bait directly from package container or from a dusting machine at an application rate of 1/4 lb. [15 g] per 500 sq. ft. [15 g per 500 sq. ft.] per application. DO NOT FEED. PLEASE, keep flies 2 feet away and between particles. Do not allow food producing animals or pets to have access to treated areas.

BAIT STATIONS:

Use GOLDEN MALRIN [Flytek] Flybait in any commercial bait station secured 4 feet above ground and inaccessible to food producing animals, pets and children in the following areas: stables, milking parlors, kennels, fast food establishments, restaurants, commissaries, bakeries, supermarkets, refuse dumpsters and warehouses. Use at the rate of approximately 4 oz. [1/4 lb.] per 500 sq. ft.

STORAGE & DISPOSAL: Do not contaminate water, food or feed by storage and disposal. 15 g Pouch Disposal: Do not reuse empty pouch. Wrap and put in trash collection. Pesticide Disposal: Pesticide or rinse water that cannot be used according to label instructions must be disposed of according to applicable Federal, State, or local procedures. Container Disposal: (can) Triple rinse. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other approved State and local procedures. Container Disposal: (drum) Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles.

e of 6

Empty residue into application equipment. Then dispose of liner and drum in a sanitary landfill or by incineration if allowed by State and local authorities.
