REFUND IF NOT SATISFIED

DIRECTIONS: Remove collar from package and place around cat's neck. Adjust for proper fit and buckle in place. Collar must be worn loosely but securely enough to prevent easy removal and loss. Cut off any excess length of collar, leaving ample length for expansion as the cat grows, and dispose of by discarding in trash. Check and adjust collar periodically to assure a proper fit. Do not use on kittens under 6 weeks of age.

RESULTS EXPECTED: The flea and tick collar starts killing fleas and ticks when it is placed around the cat's neck. Fleas will be killed and new ones which may temporarily appear on the cat will also be killed during the 5 months. Ticks are tough occasional pests of cats and will be killed within a few days. For continuous protection, replace collar when effectiveness diminishes.

ACTIVE INGREDIENT

o-Isopropoxyphenyl methylcarbamate 9.4%
INERT INGREDIENTS: 90.6%

CAUTION: Do not open inner envelope until ready to use. Do not allow children to play with this collar. Dust will form on this collar during storage. Do not get dust or collar in mouth, harmful if swallowed. Do not get dust in eyes, will cause temporary pupillary constriction. * In case of contact, flush eyes with water. Wash hands thoroughly with soap and water after handling collar. The dust released by this collar is a cholinesterase inhibitor.

Note to Physician: Atropine and *homatropine are antidotal.

When collar is first worn, observe neck area every few days for irritation. Any collar, when fastened too tightly, may cause skin irritation. Remove collar at the first sign of irritation or adverse reaction. Collar is intended for use as an insecticide generator and is not to be taken internally by man or animal. Do not use on sick or convalescing animals. Do not use any other pesticide on cat while collar is worn.
