Attention: Sally J. ...

Gentlemen:

Subject: Amendment - Change Signal Word
Zoecon RP-212 House & Kennel Repellent
EPA Registration No. 1724-300
Your Application Date February 13, 1964
March 26, 1964

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

Note the following chemistry comments which will need to be addressed for future amendment actions involving data support.

1. The applicant must supply specific upper and lower limits for each active and intentionally added inert ingredient. In addition, please include a brief discussion as to how these limits were established.

Note that according to present regulations and policy, the label claim for each active ingredient must not be more than the lower certified limit for that ingredient.

2. Please provide the density/specific gravity of this product-- if it is not N.A.
3. Please provide a viscosity measurement of the concentrate without propellant.
4. We strongly prefer to see intermediate data on long term storage stability. If they are available, please submit them. However, the report included with this submission is acceptable as minimum evidence of satisfactory stability.

Sincerely yours,
