ZOECON RF-208 FOGGER

With GENCOR™

Insect Growth Regulator

**NEW - UNIQUE - SPECIAL - DIFFERENT - REVOLUTIONARY
SCIENTIFIC BREAKTHROUGH - NO STICKY MESS**

Birth Control for Roaches

Eliminates Roach Populations

Continuous Protection for 120 days
(4 months)(16 weeks)

Removes Roaches Natural Ability to Reproduce

Biorational Approach To Roach Control

Works With Nature to Interrupt The Life
Cycle Of The Roach

Effectively Controls Roach Populations
By Preventing Reproduction

Effectively Breaks the Roach Life Cycle

No Lingering Odor

No Stains

No Cleanup Necessary

Easy To Apply

Premise Usable After Only 30 Minutes

ACTIVE INGREDIENTS:

Hydroprene [Ethyl (E,E)-
3,7,11-trimethyl-2,4-dodecadienoate]..... 1.20%

INERT INGREDIENTS..... 98.80%

Total.... 100.00%

KEEP OUT OF REACH OF CHILDREN

CAUTION

See Back Panel For Additional Precautionary Statements

NET CONTENTS: 6 oz. (170 g)

GENCOR is a trademark of Zoecon Corporation

JAN 25 1995

The active ingredient in the Zoecon RF-208 Fogger is GENCOR™ Insect Growth Regulator. GENCOR is unique in that it controls roach populations without direct poisoning like conventional insecticides. GENCOR is also unique in that it is similar to insect growth regulators that occur naturally in insects.

The Zoecon RF-208 Fogger provides the elimination of roach populations with the characteristics of the biorational insecticide GENCOR.

GENCOR effectively controls roach populations by inhibiting roach reproduction. Within a few weeks after application you will begin to see roaches with effects of GENCOR. These roaches can not reproduce. In time, the roach population will be reduced by the failure of roaches from developing into reproductive adults thereby effectively breaking the roach life cycle.

GENCOR causes a gradual reduction and ultimate elimination of roach populations. GENCOR is more effective than conventional insecticide effective in killing roaches should be applied every 4 months to maintain continuous protection.

When GENCOR is applied by itself a reduction in the roach population will be noticed at around 4 months. Major population reductions will be noticed within 12 months. Zoecon RF-208 Fogger should be applied every 4 months for continuous protection.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION: Harmful if absorbed through the skin. Avoid breathing mist. Avoid contact with clothing. May cause eye irritation. In case of contact, flush with plenty of water. Get medical attention if irritation persists. Avoid contamination of food and foodstuffs. Do not use in or near food processing plants, restaurants, or other areas where food is processed. Do not use in serving areas while food is exposed.

PHYSICAL AND CHEMICAL HAZARDS: Contents under pressure. Do not expose to heat or open flame. Do not puncture or incinerate container. Exposure to 130°F may cause bursting.

DIRECTIONS FOR USE - It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For best results, treat entire dwelling with particular attention to bathrooms. Use one fogger for each 375 sq.ft. of floor space.

1. Close outside doors and windows and turn off fans and air conditioning.
2. Extinguish open flames except pilot lights.
3. Remove pets. It is not necessary to cover or remove fish tanks.
4. Open all cupboards and drawers and remove contents.
5. Remove or cover exposed food, dishes and plastic items, covers, and notion boxes. Leave rugs, drapes, slip covers, etc. in place. Used as directed, this product will not harm the items.
6. Place fogger on floor, table or chair with newspapers or paper under the can.
7. Keeping at arm's length, point top of can away from face and to lock in position and start fogging action. Set in treated area for at least 30 minutes.

STORAGE & DISPOSAL:

Storage - Store in a cool, dry place. Keep out of reach of children. Disposal - Do not puncture or incinerate. Wrap in newspaper for collection.
