first, it was done on a formulation other than that of the subject product. It is somewhat acceptable to cite storage stability studies which test concentrations both above and below a subject concentration. However, this study was done only on single concentration of each active ingredient, below that of the subject product.

Secondly, the inserts are not specified for the material tested. It may have contained stabilizing ingredients.

2. In view of the above, the data are not sufficient to support the claim that the product is stable for the period of time indicated on the label. The data are not sufficient to support the claim that the product is stable for the period of time indicated on the label. The data are not sufficient to support the claim that the product is stable for the period of time indicated on the label.

In any case, accelerated stability data are not acceptable, only as interim data. The stability data must be submitted as soon as available.

The label says this product is a life-cycle regulator. We would like to see the following: "Effectively controls reproduction; prevents reproduction, thereby eliminating future generations."

3. Pursuant to 40 CFR § 162.10 (5)(I-X)(A-H) your label has several false or misleading statements on it. These statements such as the following must be deleted:

- (1) SPECIAL - DIFFERENT - REVOLUTIONARY, SCIENTIFIC BREAKTHROUGH, etc.
- (2) "BIORATIONAL APPROACH TO ROACH CONTROL"
- (3) "ZOECON'S RF-257 IS THE TOTAL ANSWER TO ROACH CONTROL"

The data listed does not include certified limits. You must state specifically what the upper and lower limits are for each active ingredient and each separately added inert ingredient. There are two major alternate formulas, and several minor variations on each of them. You must provide certified limits for each of the several alternate formulas, each containing the information for active and individually added inert ingredients.

You must also provide a viscosity measurement for the concentrate without the propellant.

4. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with PIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

GENCOR is a trademark of Zocon Corporation

Zocon RF-252 Aerosol is the total answer to Roach Control. GENCOR™ Insect Growth Regulator, an ingredient which inhibits the ability to reproduce, thereby eliminating future generations (adulticide) that kills existing roaches. This powerful ingredient penetrates through cracks and crevices to kill them where they hide.

One to two weeks after application you will begin to see the effects of GENCOR. These roaches cannot reproduce. Roaches are prevented from developing into reproductive adults, breaking the roach life cycle.

Use Zocon RF-252 Aerosol to kill adult roaches and to prevent their ability to reproduce future generations. Zocon RF-252 should be applied every 4 months to maintain continuous protection.

Zocon RF-252 Aerosol leaves no bad smell, no sticky mess, and does not stain furnishings.
