

U.S. ENVIRONMENTAL PROTECTION AGENCY  
OFFICE OF PESTICIDES PROGRAMS  
REGISTRATION DIVISION (MH 562)  
WASHINGTON, D.C. 20460

EPA REGISTRATION NO.

DATE OF ISSUANCE

TERM OF ISSUANCE

**NOTICE OF PESTICIDE:**

REGISTRATION  
 REREGISTRATION

*Under the Federal Insecticide, Fungicide,  
and Rodenticide Act, as amended.*

NAME OF PESTICIDE PRODUCT

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

REGISTRANT NAME  
ADDRESS  
CITY  
STATE  
ZIP

**NOTE:** Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

SIGNATURE OF REGISTRANT (Print Name)

First, it was done on a formulation other than that of the subject product. It is sometimes acceptable to cite storage stability studies which test concentrations both above and below a subject concentration. However, this study was done only on single concentration of each active ingredient, below that of the subject product.

Second, the inerts are not specified for the material tested. It may have contained stabilizing ingredients.

**[REDACTED]**

CBC

In addition, the report does not include data, but only summarize it.

We can draw some general conclusions from the information we have, applicable to the product tested, and possibly to the subject product. However:

- (a) Since the variation reported within a given time period is much less than that between time periods, it should follow that the changes with the variability observed is more likely due to some other factor. For instances, if the sample from the various times also are from different batches or containers they might show this amount fluctuation. It would be helpful to have a full protocol of the storage and sampling phases of the study.
- (b) Bearing in mind comment (a), the results appears to be somewhat consistent with satisfactory stability, but they do not demonstrate this stability beyond reasonable doubt. Note that if the decrease in concentration of hydroprene is real, it would be approaching a significant level.

In any case, accelerated storage stability studies are acceptable only as interim data. The required one-year study must be submitted as soon as available.

The label says six different ways that this product is a life-cycle regulator. We recommend one statement, for example the following: "Effectively controls roach populations by preventing reproduction, thereby eliminating future generations."

3. Pursuant to 40 CFR § 162.10 (5)(I-X)(A-B) your label has several false or misleading statements on it. These statements such as the following must be deleted:

- (1) SPECIAL - DIFFERENT - REVOLUTIONARY, SCIENTIFIC BREAKTHROUGH, etc.
- (2) "BIORATIONAL APPROACH TO ROACH CONTROL"
- (3) "ZOECON'S RF-257 IS THE TOTAL ANSWER TO ROACH CONTROL"

The data listed does not include certified limits. You must state specifically what the upper and lower limits are for each active ingredient and each separately added inert ingredient. There are two major alternate formulas, and several minor variations on each of them. You must provide certified limits for each of the several alternate formulas, each containing the information for active and individually added inert ingredients.

You must also provide a viscosity measurement for the concentrate without the propellant.

4. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

# ZOECON RF-254 AEROSOL

with GENCOR™ Insect Growth Regulator

NEW - UNIQUE - SPECIAL - DIFFERENT - REVOLUTIONARY  
SCIENTIFIC BREAKTHROUGH - NO STICKY MESS

Kills (Controls) Cockroaches, Flies, Ticks, and Fleas

Kills (Controls) Existing Roaches

Eliminates Roach Populations

Continuous Protection for 120 days (4 months)(17 weeks)

Removes Roaches Natural Ability to Reproduce

Biorational Approach to Roach Control

Works With Nature to Interrupt The Life Cycle Of The Roach

Effectively Controls Roach Populations  
By Preventing Reproduction

Effectively Breaks The Roach Life Cycle

Inhibits Roaches Natural Ability To Reproduce,  
Thereby, Eliminating Future Generations

No Lingering Odor

No Stains

No Cleanup Necessary

Easy to Apply

## ACTIVE INGREDIENTS:

Permethrin [(3-Phenoxyphenyl)methyl(+) cis-trans-3-(2,2-dichloroethenyl)-2,2- dimethylcyclopropanecarboxylate].....	0.25%
Hydroprene [Ethyl (E,E)-3,7,11-trimethyl- 2,4-dodecadienoate].....	0.60%
INERT INGREDIENTS.....	99.25%
TOTAL.....	100.00%

KEEP OUT OF REACH OF CHILDREN

## WARNING

See Back Panel For Additional Precautionary Statements

NET CONTENTS: 12 oz. (340 g)

GENCOR is a trademark of Zocon Corporation

Zocon RF-254 Aerosol is the total answer to Roach GENCOR™ Insect Growth Regulator, an ingredient ability to reproduce, thereby eliminating future (adulticidi) that kills existing roaches. This p through cracks and crevices to kill them where they

One to two weeks after application you will begin wings - showing the effects of GENCOR. These roach roaches are prevented from developing into reproducing breaking the roach life cycle.

Use Zocon RF-254 Aerosol to kill adult roaches ability to reproduce future generations. Zocon RF every 4 months to maintain continuous protection.

Zocon RF-254 Aerosol leaves no bad smell, no stain does not stain furnishings.

PRECAUTIONARY STATEMENT  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS - WARNING: not get in eyes. Avoid contact with skin and clothing inhaled, or absorbed through the skin. Avoid contact with animals or humans.

Avoid contamination of food and foodstuffs. Do not use in food processing plants, restaurants, or other areas where food is prepared, processed or stored. Do not use in service areas.

STATEMENT OF PRACTICAL TREATMENT: If in eyes - Flush with medical attention if irritation persists. If in clothing and wash affected areas with soap and water. If in air. Apply artificial respiration if indicated.

PHYSICAL AND CHEMICAL HAZARDS: Contents under pressure. Do not heat or open flame. Do not puncture or incinerate. Temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE: It is a violation of Federal law to use in a manner inconsistent with its labeling.

Apply the Zocon RF-254 Aerosol to the areas of the baseboards, beneath and behind sinks, stoves, refrigerators, plumbing, behind drawers and the inside of cabinets.

Cover or remove exposed food, dishes, utensils, food items before treatment.

One can will treat the average size kitchen and bathroom.

STORAGE & DISPOSAL: Store in cool, dry container and put in trash.
