## SPRAYER PREPARATIONS AND PRIMING

Although the sprayer has been primed and tested at the factory, it may need to be primed again before use. First, be sure that the bottom of the hose is below the liquid level in the bottle and check the adjustable nozzle on sprayer to make certain it has not been turned completely off.

Should the sprayer fail to work after 8-10 pumps, submerge the entire sprayer and hose in clean water and pump several times while under water to reprime the pump. (See section on non-functional sprayers if priming is ineffectual).

## ADJUSTING NOZZLE

The adjustable nozzle has been designed to offer a variety of spray patterns, depending on your specific use. For broadest coverage, adjust to a fine spray mist or rotate the nozzle to a coarser sprayer.

## STORAGE

Store container out of reach of children. Remove sprayer and replace shipping cap between uses to prevent leakage, spillage or evaporation. To prevent drainage during short-term storage place sprayer under handle on container so that sprayer is not below level of content of container. To ensure long sprayer life. . . remove from bottle after each use and clean by pumping clear water through sprayer for 10 seconds [Use sprayer for this product only].

## FOR NON-FUNCTIONAL SPRAYERS

Remove nozzle cover. Check holes for obstruction in nozzle and plastic components. With nozzle cover removed, submerge sprayer and hose in warm water. Operate trigger 10-15 times until spray begins. Replace nozzle cover, pump to remove clear water from hose and begin spray treatment.

PLEASE READ ENTIRE PRODUCT LABEL CAREFULLY  
AND USE STRICTLY IN ACCORDANCE WITH  
CAUTIONS AND DIRECTIONS
