FEEDING AND MANAGEMENT INSTRUCTIONS

When used as directed Zoëcon® Granular IGR Cattle Supplement will provide sufficient S-methoprene insect growth regulator to prevent the emergence of adult horn flies from manure of treated cattle. Existing adult horn flies will not be affected. Start feeding before horn flies appear and continue use until cold weather marks the end of horn fly season. Use the following management techniques to **maintain continuous intake of Zoëcon Granular IGR Cattle Supplement at a level of 1/4 to 1/2 lb per 100 lb animal body weight per month.**

1. Assure cattle are not starved for nutrients in Zoëcon Granular IGR Cattle Supplement by providing them prior to feeding Zoëcon Granular IGR Cattle Supplement.
2. Offer cattle 50 lb of Zoëcon Granular IGR Cattle Supplement for every 15 head of cattle.
3. Remove all other self-limiting nutritional supplements.
4. Locate Zoëcon Granular IGR Cattle Supplement where cattle congregate (watering, loafing, shade areas).
5. Replenish Zoëcon Granular IGR Cattle Supplement on a regular basis as needed.
6. If intake of Zoëcon Granular IGR Cattle Supplement is below 1/4 lb per 100 lb animal body weight per month increase the number of feeding locations and/or change location(s) to areas more frequented by cattle.
7. If intake of Zoëcon Granular IGR Cattle Supplement is above 1/2 lb per 100 lb animal body weight reduce the number of feeding locations and/or change location(s) to areas less frequented by cattle.
8. Introduction of this product after an adult horn fly infestation is established will require treatment of cattle with adulticides if immediate elimination of the adult fly population is desired.
