PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION: Do not get in mouth. Harmful if swallowed. Wash hands thoroughly with soap and water before and after handling strip. If swallowed, contact your physician. After treatment, do not use beeswax for human consumption.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Wear gloves (e.g. latex) when handling the strips.

Attach the Zoecon RF-349 APISTAN® Strip to the top of the bee package in a central position so that it hangs freely. Do not obstruct screen side of the queen cage. An acceptable method of attachment is to staple the strip to the back of the queen cage. Do not use this strip directly in the queen cage or as a treatment in hives. Use the Zoecon RF-348 APISTAN Queen Tab for queen cages and Zoecon RF-318 APISTAN Strip for hives.

Bees must be exposed to the APISTAN Strip for 5 days. Bees may be certified apparently free of Varroa mite as long as they are not subjected to reinfestation. Queens shipped with package bees should be treated with the Zoecon RF-348 APISTAN Queen Tab according to label directions.

Monitor the bees' food source and replenish as necessary.

STORAGE & DISPOSAL: Keep strips in original, unopened package until ready to use. Do not store in direct sunlight. Do not store unused strips in anything but original package. Do not store unused strips near pesticides or other chemical substances that could contaminate the strips and result in bee toxicity. Do not reuse strips. Do not contaminate water, food or feed by storage or disposal. Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility.
